CHAPTER 1

INTRODUCTION

The Twente (Twantay) Canal is an artificial waterway connecting between the Ayeyawrady delta area and the Yangon River in Myanmar, which was completed by British Government in 1883 over the length of 34 km. Over a century, the Twente (Twantay) Canal has been changed and improved by shortcutting, widening and deepening, reverting, etc. However, due to lack of regular maintenance, it has become irregular by local erosion and deposition, which is threatening safe and smooth ship navigation. Aware of the necessity of systematical improvement and management of the Twente (Twantay) Canal, Ministry of Transport and Communications (MOTC) instructed the Directorate of Water Resources and Improvement of River Systems (DWIR) under the MOTC to deliberate how to effectively improve the Twente (Twantay) Canal and to systematically manage it even with foreign aids in 2012.

Twente (Twantay) Canal Improvement project was conducted by cooperation between Directorate of Water Resources and Improvement of River Systems (DWIR) of the Ministry of Transport of the Union of Myanmar and the ISAN Cooperation from the Republic of Korea. The first stage of implementation of the Twente (Twantay) Canal Improvement Project will be carried out by the loan of Economic Development Cooperation Fund (EDCF) from the Korean Government and the project will be benefitted for local people in the region and people using the canal by providing safe navigation, smooth flow of cargos, bank protection, flood protection and development in tourism.

TOR for EIA of the proposed project has been issued by MONREC-ECD on 08 May 2019, with the following provision:

“...(e) To include resettlement action plan for the affected persons from proposed project including loss of land, magnitude, type of lands, number of affected houses and livelihood restoration plans in the assessment report.”

In addition, the EDCF Safeguard Policy, of the Export-Import Bank of Korea, donor of the ODA concessionary loan for the project implementation, ensures the borrower " shall prepare RP, if the proposed project will have involuntary resettlement impacts, RP aims to restore or improve the quality of life of displaced persons to or above pre-project levels, and its level of details and comprehensiveness shall be commensurate with the significance of involuntary resettlement impacts." (Art 26 of the Policy)

The preliminary assessment of the project, based on the assumption of ROW to be within the 30 m range from the boundary of the construction site (and 30 m from boundaries of the shipyards in Kanaungto), about 2,697 households (with 669 lots and 2,697 structures) were identified to be subject to the land acquisition and involuntary resettlement. Based on the international safeguard standards such as ADB Safeguard Policy Statement (2009), the rule of thumbs in good international practices is that over the 40 households subject to involuntary resettlement triggers the need for establishment of the Resettlement (Action) Plan.

Therefore, the proposed project is required to develop a separate resettlement action plan (RAP) from the ESIA.

CHAPTER 2

PROJECT DESCRIPTIONS

2.1 Objectives and Main Components

The Twente (Twantay) Canal water improvement Project was designed to address the current river erosion and frequent flooding that have hampered the use of safe inland waterways and affected the lives of residents near the canal. It is essential to improve the condition of canal for regional development and safe inland waterway by reducing the damage from floods.

The proposed project is divided into two phases taking into consideration of the urgency and scale of the project: Phase 1: Channel Training and Flood Embankment, and Phase 2: Multi-Purpose Barrage Development. Project components at Phase 1 comprise measures to resolve urgent and serious problems such as bed and bank erosion and flood damages. Channel training measures are designed to reduce the flow velocity due to the tidal flow and to stabilize the flow field in the Twente (Twantay) Canal. Flood embankment measures are to secure to prevent the inundation of the canal water above the designed flood level during the largest spring tide. This project components at phase 1 will ensure less physical, social, and environmental damages due to bed and bank erosion and flood and protect lives, properties, and livelihood of affected persons.

The project area, part of the Twante Canal (between 0 mile and 6.5 mile) and part of the yangon river (the right bank of a river) is located in the Yangon South District of Yangon Region. The geographical coverage of the area is part of the Dala Township, SeikkyiKhanaungto Township, Kyimyindaing Township and Twante Township. The location map of the project components phase 1 is shown in Figure 2-1 below. Explanation of each of the components at phase 1 are presented in the following.

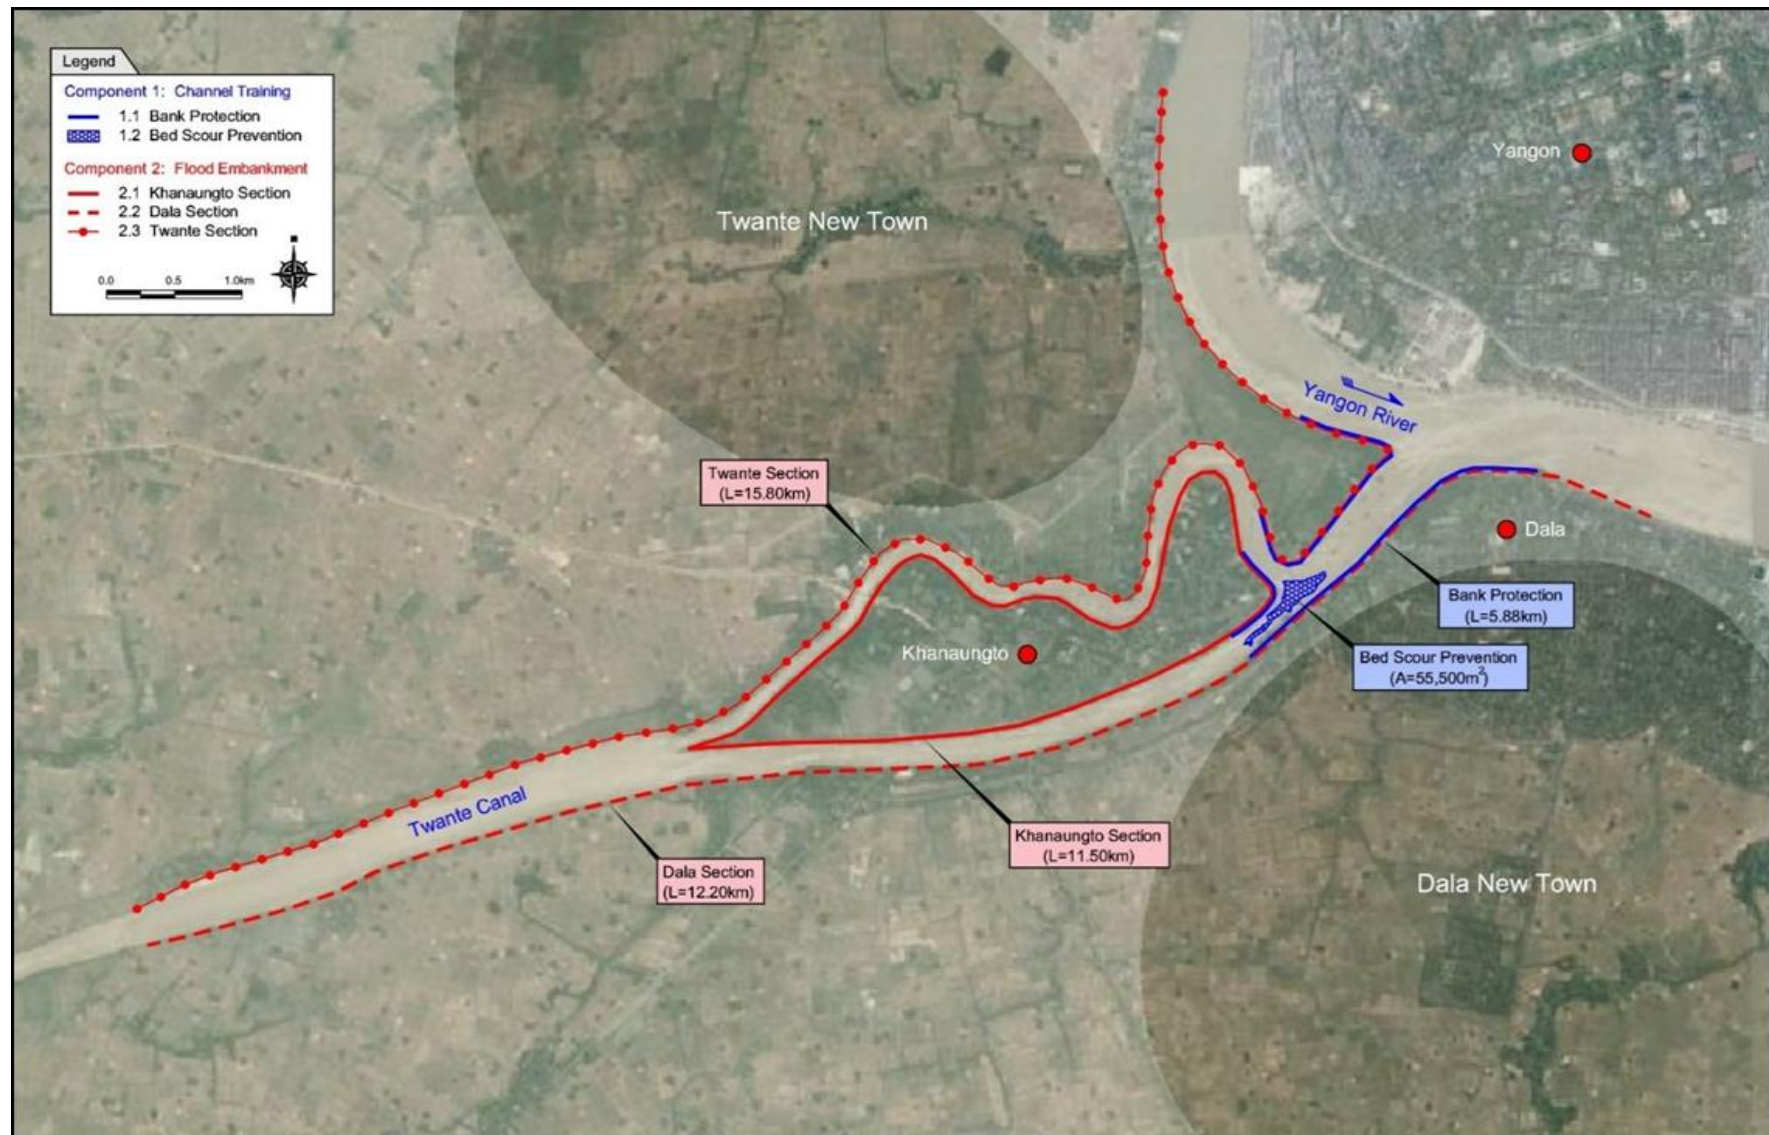

Figure 2-1: Location Map of Proposed Project Components at Phase 1

■ Component 1: Waterway Maintenance

Component 1 consists of two sub-components such as 1.1-Bank Protection and 1.2 -Bed Scour Prevention as shown in Figure 2-2. The main purpose of Sub-Component 1.1-Bank Protection is to mitigate channel contraction reducing the flow velocity and erosion risk near '0' mile junction. Major work items include as below:

- 1) To remove 4 groynes on both sides at 0.5 mile,
- 2) To improve the channel alignment near 0.5 mile, and
- 3) To install the bank protection near '0' mile junction area (L=5,880m).

Figure 2-2: Location Map of Component 1

Sub-component 1.1 was designated to protect the bank from erosion due to tidal flows near '0' mile junction and to regulate the velocity field. Particularly, it aims to reduce the maximum flow velocity at 0.5 mile, that is, the maximum velocity of 2.37 m/s decreases to 1.19 m/s during the flood tide while the maximum velocity of 3.23 m/s decreases to 1.46 m/s during the ebb tide. It is encouraged that this sub-component affects negligibly the flow field at 3.5 mile inducing 3~4% increase of flow velocity as shown in Table 2-1. However, it is noticeable that there is potential of bed change near the junction at 0 mile showing low velocity field near the junction of the Khanaungto Creek, recapping that multi-purpose barrages at Phase 2 are required as permanent measure against the bed change. Based on the soil investigation results near the Project site, it was found that the Twente (Twantay) Canal is on the

weak foundation and so the following factors shall be considered for the design of bank protection:

- 1) Weight reduction using lightweight materials,
- 2) Soil improvement by replacement, and
- 3) Frame formation by piling.

Basically, the original silty soil is required to be replaced by sandy soil for stability of the bank protection, which was considered for the design in the Study. The bank protection proposed in the Study consists of slope protection and toe protection. First, the slope protection is to protect the bank erosion from tractive force of tidal flow and wave action from shipping and its type can be classified into hard and flexible surface types. The hard surface type may cover the bank using brick, concrete block, cement grouted rock, etc. while the flexible surface type may use gabion mattress, hand-placed, dry rubble facing, dumped riprap, Reno mattress, etc. Main features of slope protection type can be compared as seen in Table 2-2. As seen in the table, each type has both strong and weak points and with regard to weak foundation of the Project site, the rip-rap type was found to be unsuitable for slope protection while two types of environmental block and gabion mattress were considered in the Study.

Table 2-1: Summary of Flow Velocity Distribution at 0 and 3.5 Miles

Division			Original	Case1	Case2	Case3	Case4	Case5	Case6	Case7
Flood Tide	0.5 mile	Max.	2.37	1.19	1.93	1.66	1.24	1.03	1.74	1.06

Note) +++: excellent, ++: fair, +: poor

The toe protection serves as the foundation of slope protection against falling down of the back-fill and slope covering materials preventing from scouring at the foundation of slope protection. In general, dumping rip-rap, gabion box or piling with filling stones is applicable for the toe protection, which was considered for the design in the Study. Two types of bank protection are proposed as seen in Table 2-3 and Figure 2-3.

Table 2-3: Structures of Bank Protection Type

Division	Type 1	Type 2	Remarks
Slope Protection	<ul style="list-style-type: none"> • Environmental block • Geotextile • Sand replacement • 1:2 slope 	<ul style="list-style-type: none"> • Gabion mattress • Geotextile • Sand replacement • 1:2 slope 	
Toe Protection	<ul style="list-style-type: none"> • Gabion box • Sand and rubble • Piling 	<ul style="list-style-type: none"> • Gabion box • Sand and rubble • Piling 	
Bottom Protection	<ul style="list-style-type: none"> • Stone pouch 	<ul style="list-style-type: none"> • Stone pouch 	
Photographs			

Figure 2-3: Typical Section of Bank Protection

The main purpose of Sub-Component 1.2 Bed Scour Prevention is to mitigate irregularity in flow depth and to regulate the stream wise flow field near '0' mile junction raising the minimum bed level from El.-27.6m to El.-15.0m. In principal, the deep pool near '0' mile junction will be filled with sand materials and the channel bed can be armored by riprap, gabion mattress, concrete block, etc. for scouring prevention whose dimension can be determined based on flow characteristics.

Referring to HEC11 from U.S. Department of Transportation Federal Highway Administration, and Design Guidelines by the Ministry of Land, Infrastructure and Transport (MOLIT) of Republic of Korea, the armoring countermeasures are designated as shown in Table 2-4. In the Study, the main features for each countermeasure were seriously reviewed and finally the stone gabion with fiber pocket was adopted for bed armoring in the Project as shown in Figure 2-4.

Table 2-4: Main Features of Armoring Countermeasures

Division	Riprap	Stone Gabion (wire)	Stone Gabion (fiber)
Requirements	<ul style="list-style-type: none"> • Riprap size (0.3 m) • Thickness (0.5 m) 	<ul style="list-style-type: none"> • Riprap size (80~150 mm) • Thickness (0.3 m) 	<ul style="list-style-type: none"> • Riprap size (80~150 mm) • Thickness (0.3 m)

■ Component 2: Flood Embankment

The main purpose of this component is to secure not to over the flood level during the largest spring tide in Khanaungto, Dala, and Twente (Twantay) Townships. This component is divided into three sub-components according to the sections as shown in Figure 2-5. Major work item is to embank along canals with drainage facility and concrete pavement as shown in Figure 2-6.

In this study, the levee crest was designed to be 1.5m higher than high water level considering freeboard covering concrete pavement for traffic. The crest width of at least 7m was set up for two-lane road. For slope protection, seeding mattress and sodding were designed on the river and land sides, respectively, and the slope is adjustable from 1:2 to 1:3 according to the density of residential area land use. It was found from the site investigation that the dense residential area approximately corresponds with the bank protection site by Component 1. Based on design criteria and preliminary design as described above, the typical cross-sections are section by section drawn in Figure 2-7 and the work quantities for

Phase 1: Channel Training and Flood Embankment were estimated as seen in Table 2-5.

• Drainage Facility		M	15,800	

2.2 Implementation Schedules

Project implementation schedule was established while considering similar projects in Korea and Myanmar, construction quantities, climate conditions (dry and wet seasons) in the Project site. Total 6 years are required for the Project including 3 months for Consultant selection, 9 months for detailed design and tender service, and 60 months for construction and supervision as seen in Figure 2-8 and

Table 2-6 shows the annual investment plan based on construction quantities.

2.3 Expected Benefits

A. Better and Safer Access to Inland Water Transport

Before 2009, there was a deep pool at 3.5 mile of Twente (Twantay) Canal and it generated high speed flow and vortices there during the ebb tide, which caused to reduce the traffic volume. Since channel widening in 2009, the traffic through the Twente (Twantay) Canal was recovered and became normal as of now.

Presently, there is a deep pool at 0 mile of Twente (Twantay) Canal, which is similar to previous one at 3.5 mile, it is also causing high speed flow and vortices at 0 mile during the ebb tide. The pool is getting deeper with time and it generates more unstable flow at 0 mile. This motivates the Project to secure the safe navigation.

Based on the previous experiences, it is reasonable to assume that the freight transport by inland waterways will be reduced due to the unstable waterway at 0 mile without the Project and then the reduced traffic will be transported by the second-best way (railway). The transport unit cost of inland waterway is 20.60 Kyats/ton-mile lower than that of railway. Therefore, the difference in unit prices of freight transport between inland waterway and railway causes the increase of the transport cost, which can be considered as the project benefits. Also, as of now, toll fee of Twente (Twantay) Canal are 35 Kyats/ton for vessels over 100 ton, and 50 Kyats/ton for vessels below 100 ton. When using railway instead of Twente (Twantay) Canal, the toll fee for railway will be collected, even though the Project will prevent reduction of the number of vessels and secure the toll fee of Twente (Twantay)

B. Prevention of Land Loss

From official interview in the F/S, it was found that land loss occurs by bank erosion along the Twente (Twatay) Canal and lost area reaches 128 and 1,115 m² per annum in Khanaungto and Dala townships, respectively. The estimated benefits from prevention of land loss become US\$ 0.225 million after the completion of channel training.

C. Prevention of Flood Damages

It was found in the F/S that total 6,821 ha can be protected from flood damages during the largest spring tide. From the official interview in the F/S, the unit price of flood damages was estimated as shown in Table 1.7 Houses, other buildings, farmland, etc. damaged by the flood are estimated using flood inundation map during the largest spring tide prepared in the F/S.

In the F/S, urbanization according to the new town development plan of Yangon was assumed causing the increase of houses, buildings, and other infrastructures. In July 2015, Yangon Regional Government invited tender for development of the new town expansion project after the parliament's approval indicating the new town development has been realized as the plan. Consequently, the estimated flood damages are considered as the annual project benefits from the flood protection.

Table 2-7: Unit Price of Flood Damages

Classification	Unit	Unit Price			
		Dala	Twente	Seikkyi Khanaungto	Adopted
House	Kyats/EA	1,130,000	61,670,000	23,680,000	1,130,000

2.4 Executing Agency

Waterways Department was organized and founded in 1972 by combining Dredging and River Conservancy sections of Department of Marine Administration and parts of Hydrographic Surveying section of Port Corporation under Ministry of Transport and Communication. In 1999, the Department was extended and reorganized as the DWIR. The DWIR has been expended and reorganized with the increase of international attention, aids, and investment on water resources in Myanmar (see Figure 2-9).

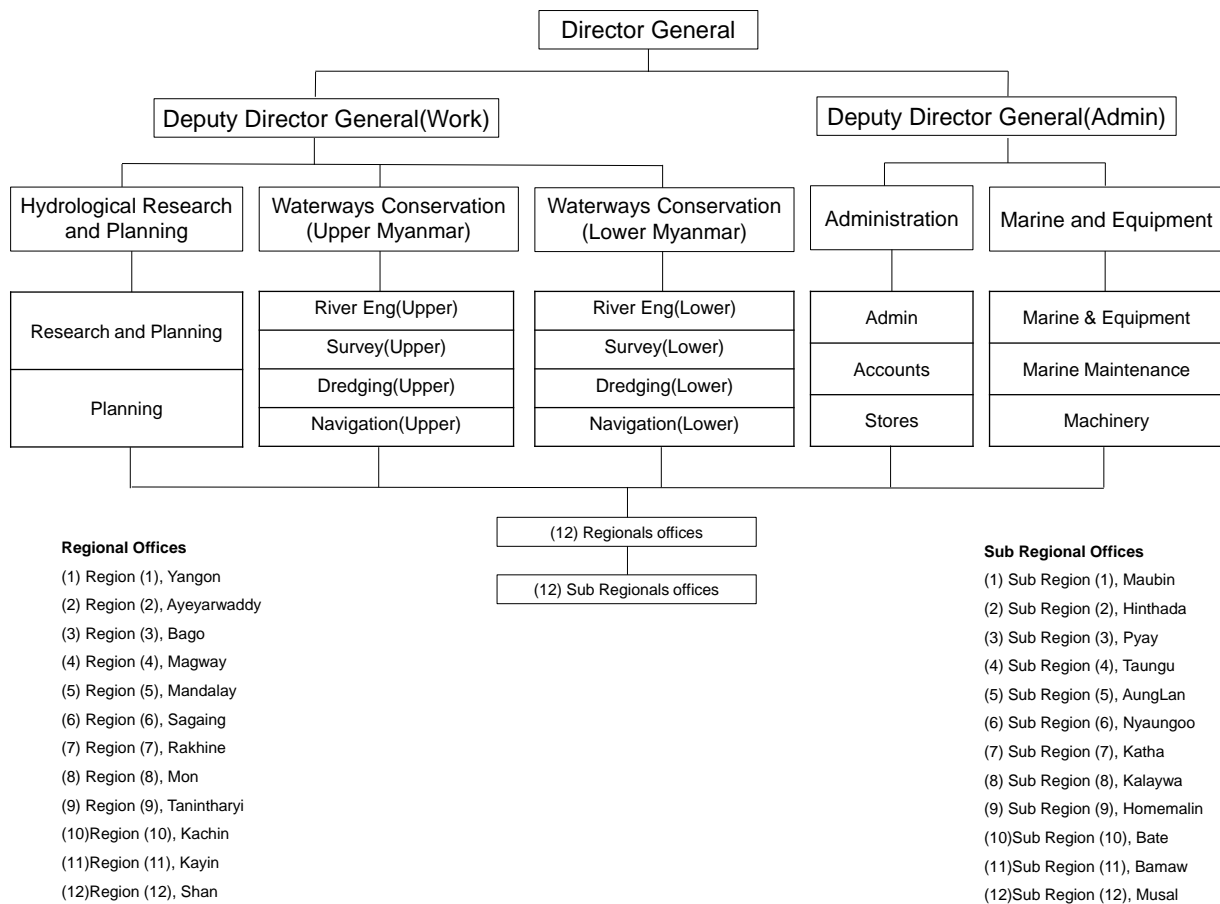

Figure 2-9: Organizational Structure of DWIR

The DWIR has implemented river training works in the Twente Canal, which are small-scaled works financed by the Myanmar Government.

CHAPTER 3

APPLICABLE NATIONAL AND LOCAL LAWS, REGULATIONS AND POLICIES

3.1 Government of Myanmar

Relevant laws and regulations related to land tenure, land use, land acquisition, compensation of assets and losses in Myanmar are summarized in Table 3-1.

A. Types and Classes of Land in Myanmar

Virtually all land in Myanmar is owned by the State and with the exception of some freehold titles mainly in urban areas, the remaining land parcels in the country (except Forest Land, Grazing Land, land held in Cantonment and Monasteries) are rented out to individuals and companies through Grant, Lease or License, government's in considerations of how land is used for and who uses it and for how long. From the administrative point of view, land can be classified into the following eleven categories.

1. Freehold Land
2. Grant Land
3. Agricultural Land
4. Garden Land
5. Grazing Land
6. Cultivable Land, Fallow Land and Waste Land
7. Forest Land
8. Town Land
9. Village Land
10. Cantonments and
11. Monastery

B. Laws relating to Land Acquisition and Resettlement in Myanmar

Laws and regulations related to the land acquisition, compensation and resettlement in Myanmar are summarized as follows:

Table 3-1: Relevant Laws and Regulations on Land Acquisition and Resettlement

Policy, Law and Regulation	Description
The Constitution of the Union of Myanmar (2008)	• The Constitution identifies that state is owner of all lands as well as natural resources above and below the ground, above and beneath the water and in the Union's atmosphere. Citizens and organizations are allocated land use rights but do not own the land.

Policy, Law and Regulation	Description
	<ul style="list-style-type: none"> • State has a right to enact necessary law to supervise extraction and utilization of State-owned natural resources by economics forces
Land Acquisition Act No. 1/1894	<ul style="list-style-type: none"> • The Act is still the legal basis for land acquisition which is consideration for calculating a suitable amount of compensation is to be made as quick as possible for affected person when the land is acquired by the government. • Government has authority to acquire the land under this Act not only for public purpose but also for business reasons for the companies at that time: <ul style="list-style-type: none"> ■ Whenever it appears to the President of the Union that land in any locality is needed or is likely to be needed for any public purposes, a notification to that effect, shall be published in the Gazette, and the Collector shall cause public notice of the substance of such notification to be given at convenient places in the said locality. (Article 4) ■ Relevant procedures, including notice periods, procedures for objections to acquisition (Art. 5), ■ Method of valuation of land, the process for taking possession of land (Arts. 16 and 17) ■ Court processes and appeals (Arts. 18 and 24) ■ Procedures for the temporary occupation of land (Art. 35) and the acquisition of land for companies (Art. 38). ■ Compensation 'at market value' is provided to those from whom land is acquired (Art. 23).
The Conservation of Water Resources and Rivers Law (2006)	<ul style="list-style-type: none"> • The aims of this law are as follows: (a) to conserve and protect the water resources and river system for the beneficial utilization of the public; (b) to enable smooth and safe waterways navigation along rivers and creeks; (c) to contribute to the development of the state economy through improving water resources and river system; and (d) to protect environmental impact. • The law is under the jurisdiction of the Ministry of Transport. This law focuses on transportation safety and its development. However, it lacks actual numerical criterion for natural environment.
Underground Water Act (1930)	<ul style="list-style-type: none"> • This act prohibits sinking of a tube for the purpose of obtaining underground water except under and in accordance with the terms of a license granted by the water officer. Township Officer or sub-divisional officer had power to close a license tube after exercising jurisdiction over the local area concerned and the expense of such closure shall be recoverable from the owner of the tube as if it were an arrear of land-revenue.
Canal Act (1905)	<ul style="list-style-type: none"> • The Burma Canal Act was enacted by the Authority of the Government of the Union of Burma in 1905, and amended by Burma Act in 1914, 1924, 1928, and 1934, which has the aim to use and control for public purposes the water of all rivers and streams flowing in natural channels and of all lakes and other natural collections of water, and to control and undertake in whole or in part the maintenance of any work designed for irrigation, drainage, navigation or protection against floods or erosion. • Canal Act has components enacted as below: <ul style="list-style-type: none"> ■ Application of water for public purposes ■ Construction and maintenance of works ■ Supply of water ■ Water rates ■ Village canal and village drainage works ■ Canal navigation and drainage

Policy, Law and Regulation	Description
	<ul style="list-style-type: none"> ■ Obtaining labor for canals and drainage works ■ Jurisdiction, offences and penalties, and ■ Supplementary provisions <ul style="list-style-type: none"> • All river facilities such as bank protection, flood embankment, etc. proposed by the Project for smooth inland navigation and flood protection of Twente Canal shall be complied with the Canal Act.
Embankment Act (1905)	<ul style="list-style-type: none"> • The Burma Embankment Act was enacted by the Authority of the Government of the Union of Burma in 1905, and amended by Burma Act in 1923, and 1931 • The embankment is defined as any embankment constructed for the purpose of excluding, regulating or retaining water, and includes all earthen walls, dams, canals, drains, piers, groins, sluices, buildings, water-gauges, bench-marks and other works subsidiary to any such embankment. • Embankment Act stipulates clauses regarding embankment and embankment works such as duties of Embankment-officer, obtaining labor and material, payment and compensation, offences and penalties, etc.
Forest Law 8/92	<ul style="list-style-type: none"> • The law includes the classification of type of land belonging to Forestry Department. • The law supports conservation, sustainable forestry and socio-economic benefits. • In addition, the law decentralizes forest management to some degree and encourages the private sector and community participation in forest management
Union Government Notification No. 39/2011	<ul style="list-style-type: none"> • On the application of right to use land owned by government, government departments, organization, citizens.
Myanmar Special Economic Zone Law, 2011	<ul style="list-style-type: none"> • The developer shall bear the expenses of transferring and compensation of houses, buildings, farms and gardens, orchards/ fields, plantation on land permitted by the Central Body if these are required to be transferred
Farmland Law 11/2012	<ul style="list-style-type: none"> • The law introduces right to use the land to farmers through land use certificate and acquiring the farmland for other purpose
Farmland Rules 62/2012	<ul style="list-style-type: none"> • The Rules details the eligibility of farmer or organization for the process of acquiring land use certificate, the role and responsibility of farmland committee in various level and the application process of land use certificate. • And regulating the requirement of indemnity and compensation to the affected person when it comes to the case of confiscating farms in the interests of nation.
Vacant, Fallow & Virgin Lands Management Law 10/2012	<ul style="list-style-type: none"> • Stipulation of claiming unused land to usable in form of agriculture, livestock, mining & government allowable other purpose.
Vacant, Fallow & Virgin Lands Management Rules 1/2012	<ul style="list-style-type: none"> • The Rules introduces the process of application and approval of the unused land for various purposes;
National Land Use Policy (2016)	<ul style="list-style-type: none"> • The most updated guidance notes on land acquisition, but no procedures or laws have been defined.
Draft Guidelines on Public Participation in Myanmar's EIA Processes (2017)	<ul style="list-style-type: none"> • This is a draft version issued by MONREC on 31 May 2017 • Provide more specific guidelines conducting public consultations related to EIA procedures. • While not yet officially adopted, the EIA team was encouraged to refer to it as in draft version.

Policy, Law and Regulation	Description
Transfer of Property Act (1882)	<ul style="list-style-type: none"> • Property of any kind may be transferred, except as otherwise provided by this Act or by any other law for the time being in force. • Transfer of property may be made without writing in every case in which a
Land and Revenue Act (1879)	<ul style="list-style-type: none"> • This Act extends to Lower Burma and the Thayetmyo District of Upper Burama • The President of the Union may, by notification, except any area from the operation of this Act. • Nothing contained in this Part shall apply to the following: <ul style="list-style-type: none"> (a) Land included in any forest constituted a “reserved forest” under the law for the time being in force; (b) Land included in any fishery demarcated under the Fisheries Act; (c) The soil of any public road, canal, drain or embankment; (d) Land included within the limits of any town; (e) Land appropriated to the dwelling-places of any town or village; (f) Land included in any military cantonment; (g) Land included in any civil station;
The Lower Burma Town and Village Land Act (1899)	<ul style="list-style-type: none"> • This Act extends to Lower Burma and the Thayetmyo District of Upper Burma • The provisions of this Act shall apply only to land in towns and villages. • A landholder’s right in respect of any land shall cease if the landholder abandons of the land for two years continuously
The Partition Act (1893)	<ul style="list-style-type: none"> • Nothing herein contained shall be deemed to affect any local law providing for the partition of immoveable property paying revenue to Government.
Procedures conferring the Right to Cultivate Land (1991)	<ul style="list-style-type: none"> • The Central Committee for the Management of Culturable Land, Fallow land and waste land may grant to citizens for agriculture and livestock breeding purposes the right to cultivate/right to utilize culturable land, fallow land and waste land up to the extent mentioned below: <ol style="list-style-type: none"> 1. Agriculture 2. Livestock, Poultry Farming and Aquaculture • If an application is submitted by organization consisting of foreigners for the right to cultivate/ right to utilize land, the matter is to be referred to the Foreign Investment Commission

Procedures for the land acquisition and compensation in the content of the public purpose infrastructure development by the government is articulated in the Land Acquisition Act (1894). To list:

Sections	Key provisions of the LAA (1894)
Section 4(1)	Requires publication of preliminary notification and conducting survey
Section 5A (1) and 5A (2)	Allows for payment for all damages to the assets surveyed. Identifies filing of objections to the acquisition of any land in writing and opportunity to be heard.
	Provides for objections in writing to be heard by the Collector either in person or by pleader and further enquiry as necessary.
Section 6(1)	Requires the Government to make a more formal declaration of intent to acquire land following hearing of objections received under Section 5.
Section 7	Allows the Senior Officer to be authorized by the President of the Union to direct the Collector to take order for the acquisition of the land.
Section 8	Grants the Collector to organize the land to be acquired to be physically marked out, measured and plans.

Section 9(2)	Requires the Collector to give notice to all affected persons (APs) that the Government intends to take possession of the land and if they have any claims for compensation then these claims are to be made at an appointed time.
Section 10(1)	Allows the Collector to record statements of APs in the area of land to be acquired or any part thereof as co-proprietor, sub-proprietor, mortgagee, and tenant or otherwise.
Section 11	Requires the Collector to make enquiries into the measurements, value and claim and then issue the final award. The award includes the land's marked area and the valuation of compensation. Although the LAA requires payment of compensation, Myanmar lacks any specific methodology for determining compensation for affected land and other assets.
Section 16	After award under Section 11, authorizes the Collector to take possession of land free from all encumbrances.
Section 17	Allows acquisition of land under emergency situations
Section 18(1)	In case of dissatisfaction with the award, permits APs to request the Collector to refer the case onward to the court for a decision. This does not affect the Government taking possession of the land.

(Source: Land Acquisition and Resettlement Framework: Myanmar Climate-Friendly Agribusiness Value Chains Sector Project (Mar 2018))

3.2 International Good Practices and EDCF Safeguard Policy

EIA Procedure (2014) of Myanmar does not address specific matters in relation to resettlement. According to the Article 7 of the Procedure, projects involving resettlement shall additionally comply with separate procedures issued by responsible ministries, and in the absence of such procedures all such, Projects shall adhere to international best practice on Involuntary Resettlement (as accepted by international financial institutions including the World Bank Group and Asian Development Bank) on Involuntary Resettlement and Indigenous Peoples).

EDCF Safeguard Policy (2016) also requires the Project Proponent refer to the international practices, in case the national legislation and regulations are less stringent (Art. 18 of the Safeguard Policy 1). Thus, the Project will also need to be consistent with international lender's safeguards policies, specifically World Bank ESS 5 and Guidance Note as well as ADB's Safeguard Policy Statements (2009) on the related issues, in addition to the EDCF Safeguard Policy (2016).

3.3 Policy Gap between EDCF (and International Safeguard Standards) and Government of Myanmar

The EDCF Safeguard Policy on land acquisition and involuntary resettlement is on par with the international safeguard good practices and principles including the ADB SPS (2009). This section

¹" 18. A proposed project must comply with the borrowing country's environmental and social requirements, and may refer to internationally recognized standards, when appropriate. If the relevant requirements of the borrower's country regulations and laws are more stringent than the requirements of the EDCF Safeguard Policy or internationally recognized standards, it is required that the project may comply with more stringent requirements."

summarise major equivalence analysis and gap filling measures between the ADB SPS (2009) and the Myanmar country safeguard policies:

ADB Safeguard Policy Statement (2009)	Myanmar Country Safeguard System	Equivalence	Gap filling measures
I. Info disclosure, consultation (“Meaning participation”)	The Rangoon Development Trust Act (1920) info dissemination Farmland Law (2012) – dispute/grievance setting procedures	Partial equivalence (-) Consultation and participation procedures (-) Vulnerability consideration	RAP shall strengthen the policy on par with the EDCF Safeguard Policy Principle & ADB recommended procedures for PEA(DWIR)’s adoption
II. GRM	LAA (1894)_ Part II_ Acquisition Objection_final decision by the Union president Farmland Law (2012)_ Referral system (track-township- district – State farmland mgt body)	Partial equivalence (-) No appeal to court (No external accountability)	
III. Livelihood restoration _ (1) land-based rst for land based PAFs (otherwise: cash compensation at replacement value for land) (2) Prompt replacement of assets with access to assets of equal of higher value (3) Additional revenue and services thorough benefit sharing schemes where possible	Constitution (1984)_ land ownership by state + user right by citizens LAA (1894) Part II: Acquisition_ Enquiry into Measurements, Value and Claims and Award by the Collector LAA (1894) Part III Reference to Court and Procedure thereon	Partial equivalence (+) Replacement cost compensation of land and damaged crops at market value (+) Compensation mechanism (in Farmland Law) (-) Prompt asset replacement (-) Income restoration (-) Access to other benefits “Farmers without land entitlements (incl. minority) not protected as their lots categorized as “vacant” under the VFVM law.”(*)	Subject to PEA (DWIR) decision ►

3.4 Objectives, Policies and Principles of the Framework RAP for the Proposed Project

A. Objectives

The project has prepared this LARF to lay out the purpose, principles, and procedures to be used in screening, planning, preparing LARPs as required, and implementing resettlement for any subproject or component of the Project with resettlement or land acquisition impacts. The project's entitlements, assistance and benefits presented below are determined by the laws and regulations of the government and EDCD Safeguard Policy (2016) and take into account the extent of losses incurred by affected households resulting from acquisition of assets. The objectives of this LARF are to ensure that the following objectives are met:

1. Adverse social and physical impacts of sub-projects are avoided, minimized, and or mitigated;
2. All affected households are provided with appropriate compensation and assistance for lost assets which will contribute to an improvement of, or at least maintain, their pre-project quality of life;
3. Nobody will be disadvantaged because of the project;
4. Improve, or at least restore the livelihoods of severely affected persons and vulnerable affected households; and
5. Assistance to vulnerable groups.

B. Principles

In order to achieve the above objectives, the project will adhere to the following resettlement policies and principles:

1. Involuntary resettlement and impacts on land, structures and other fixed assets will be minimized where possible by exploring all alternative options and identifying the option with the least impact on the population;
2. No land acquisition or site clearing will be done inside the Right-of-Way (ROW) in anticipation or ahead of it being considered for implementation under the Project. Similarly, no land acquisition or site clearing will be done inside the ROW until and after the updated resettlement plan has been agreed upon by government, and until all compensation and/or

assistance due to the affected households are provided;

3. Compensation will be based on the principle of full replacement cost and market value, whichever is appropriate and most favorable to the affected household for the asset concerned;
4. All the affected households without any discrimination confirmed to be residing in, doing business, or cultivating land or having rights over resources within the project affected area or land to be acquired or used for the project during the conduct of inventory of losses (IOL) and census of affected households (prior to the cut-off date) are entitled to compensation for affected assets, incomes and businesses at replacement cost as specified in the entitlement matrix, and, depending on the severity of impact on their livelihood and income capacity, will be provided with livelihood restoration measures to improve or restore their pre-project living standards, income-earning capacity and production levels;
5. There will be no deductions in compensation payments for land, structures or other affected assets for salvage value, depreciation, taxes, stamp duties, fees or other transaction costs;
6. If ownership over any affected asset is under dispute, the compensation for the same will be held in a court designated bank until its lawful owner is decided by competent legal authorities;
7. Affected persons who are asset owners but allow others to use those assets are compensated for losses of those assets. Users of the assets would be compensated for loss of standing crops, loss of income from the asset for the course of the lease or rental agreement;
8. Affected households that lose only part of their physical assets but will not be left with a portion that will be inadequate to sustain their current standard of living as determined by affected households together with project engineers during detailed design. If not adequate to sustain current standard of living, the entire asset will be considered as totally affected and will be acquired by the project.
9. Affected shop owners, if any, will be assisted in gradually dismantling and setting up their shops in a new location to be agreed with the PMU. If no other alternative exists, the affected person may temporarily move the shop to a residual area of the right of way (ROW) and in a way, that will allow them to gradually phase out their operation in their present location place and gradually begin their operation in their temporary new place within the ROW until a permanent location is confirmed during detailed design. Under this arrangement, disruption in the operation of shop owners will be minimized, thereby averting severe impact on the affected households' livelihood. Public land and no individual household will have tenure over any land within the ROW. However, affected households presently cultivating plots inside the ROW will be allowed to continue cultivating the residual area of their cultivated plots in the ROW.
10. Temporarily affected land and communal infrastructure will be restored to pre-project conditions;

11. Meaningful consultation will be carried out with affected households, affected communities and concerned groups to ensure participation throughout the resettlement process, from planning, implementation and operation of the project. Plans for the acquisition of land and other assets will be carried out in consultation with affected households who will receive prior information of the compensation, relocation and other assistance available to them. The comments and suggestions of affected households and communities will be taken into account;
12. Any acquisition of, or restriction on access to, resources owned or managed by the affected households as a common property, e.g., communal forest, communal farm, will be mitigated by arrangements that will ensure access of those affected households to equivalent resources on a continuing basis;
13. There shall be an effective mechanism for hearing and resolving project-related grievances during the planning, updating and implementation of the resettlement plan;
14. The approved Framework Resettlement Action Plan (RAP) and Resettlement Action Plan (RAP) will be disclosed to affected households and indigenous households in a form and language(s) understandable to them.;
15. Resettlement identification, planning and management will ensure that gender concerns are incorporated;
16. Provide all affected households requiring relocation with required support including assistance and allowances, secure tenure to the relocated land, and improve living conditions at resettlement sites;
17. Special measures will be incorporated in the Framework RAP/RAP to protect socially and economically vulnerable groups. Appropriate assistance will be provided to help affected households belonging to any of these vulnerable groups improve their socio-economic status;
18. Existing cultural and religious practices will be respected and, to the maximum extent possible, preserved;
19. Adequate resources will be identified and provided during the preparation and updating of the RAP, including sufficient budgetary support in a timely manner to cover resettlement costs within the agreed implementation period; and adequate human resources for supervision, liaison and monitoring of land acquisition, resettlement and rehabilitation activities;
20. Civil works will not take place for any segment of the subproject, until (a) compensation has been fully paid to affected households; (b) agreed livelihood restoration and resettlement measures are in place, and (c) the acquired land is free from all encumbrances. Civil works contractors will not be issued notice of site possession for any section or segment until these conditions are fulfilled. The schedule of the start of civil works in any section or segment of the project will be coordinated and planned with the executing agency, implementing agency and other related local bodies.

Related to the preparation and the execution of the RAP at the later stage, following principles are recommended abiding by.

① (Full) Replacement Cost Principle

Based on the gap (equivalence) analysis between the Myanmar's current status of its own related laws and regulations and the international safeguard principles including the EDCF Safeguard Policy, the Committee is expected to establish a valuation criteria for each of the affected assets due to the project implementation, in the form of an entitlement matrix.

In calculating the full replacement costs for compensation, the World Bank provides the following guidances:

<Box 3.4> World Bank's Definition and Recommended Approach in Calculation

(Source: WB ESS 5 Guidance Note Footnote 5 of ESS 5 Para 31)

""Replacement cost" is defined as a method of valuation yielding compensation sufficient to replace assets, plus necessary transaction costs associated with asset replacement."

"When functioning markets exist, replacement cost is the market value as established through independent and competent real estate valuation, plus transaction costs."

"Where functioning markets do not exist, replacement cost may be determined through alternative means, such as calculation of output value for land or productive assets, or the undepreciated value of replacement material and labor for construction of structures or other fixed assets, plus transaction costs. "

"Transaction costs include administrative charges, registration or title fees, reasonable moving expenses, and any similar cost imposed on affected persons."

"In all instances where physical displacement results in loss of shelter, replacement cost must at least be sufficient to enable purchase or construction of housing that meets acceptable minimum community standards of quality and safety."

"The valuation method for determining replacement cost should be documented and included in relevant resettlement planning documents."

"To ensure compensation at replacement cost, planned compensation rates may require updating in project areas where inflation is high or the period of time between calculation of compensation rates and delivery of compensation is extensive."

EDCF Safeguard Policy (2016) articulates the following principles²:

² LAA (1894) **Part II: Acquisition_ Enquiry into Measurements, Value and Claims and Award by the Collector**

*"The rate of compensation for acquired land or other assets shall be calculated at full replacement costs, as much as possible. The calculation of full replacement costs should reflect **market prices, transaction costs, interest, transitional and restoration costs, and other applicable costs.**" (Art 26 of the EDCF Safeguard Policy (2016)), and;*

*"The borrower will ensure that no physical displacement or economic displacement will occur until i) compensation at full replacement cost has been paid to each displaced person for project components or sections that are ready to be constructed; (ii) other entitlements listed in the resettlement plan have been provided to displaced persons; and iii) a **comprehensive income and livelihood rehabilitation program**, supported by an adequate budget, is in place to help **displaced persons improve, or at least restore, their incomes and livelihoods.**[...]" (Art 30 of the EDCF Safeguard Policy (2016))*

In accordance with the LAA (1894), the compensation amount will be based on market value or the replacement cost principle. For details of the calculation, further specification is required as concrete methodology for market value assessment for land and other asset items are not specified in Myanmar's laws and regulations. In the course of market survey and the replacement cost study (RCS) it is recommended that the assessment methodology is reviewed in view of the key compensation principle of the EDCF Safeguard Policy (2019) and international good practices of ADB and WB (whose key approach is explained in the Section 4.5 on Replacement Cost Survey(RCS) of this report below.)

For loss of social service facility such as a monastery, the structure will be rebuilt to original or better condition in size and quality in the vicinity. Reconstruction management plan shall be carried out and details of the plan shall be determined by clarifying current use of facilities through consultation with representatives of the social facility manager.

② Consideration of vulnerable groups among PAPs/PAFs

Any vulnerable households and especially vulnerable affected households and those with women headed households, low-income households, elderly-headed households with no additional support and people with physical disabilities will be entitled to participate in any project sponsored livelihood development and restoration activities.

Preliminary survey on the above has been carried out in initial socio-economic survey to determine demand and needs, as part of the ESIA. Vulnerable groups were identified in all four townships of the study area as shown in the Table below:

Table 3-2: Vulnerable Groups of the Study Area

Township	Women-headed households	Old Persons without family support (> 75 years)	Disabled persons
Twante	60	34	19
Dala	197	111	44
Seikgyi Kanaungto	54	56	143
Kyimyindaing	10	12	25
Total	321	213	231

The majority of them are household heads who are over seventy-five years old. According to key-informants, there is no special program or activity to support these vulnerable people in this area. By social structure, they are taken care of by relatives and neighbors and are living in the communities without difficulties. The Myanmar Poverty and Living Condition Survey (2017) indicates that the national poverty line for 2017 is 1,590 kyat per adult equivalent per day (in 2017 quarter 1 kyat)³. In the later socio-economic census for the PAPs/PAFs identified based on the detailed engineering design, it is recommended that all the four types of the vulnerable groups within the PAPs/PAFs to be identified and integrated into the updated RAP as target groups for vulnerable people allowance:

<Target groups eligible for Vulnerable People Allowance>

Group 1: Women headed households

Group 2: Low-income households (persons/households with below the national poverty line)

Group 3: Elderly-headed households with no additional support and,

Group 4: People with physical disabilities

It is recommended that vulnerable households will receive assistance equivalent to minimum wages (Kyat 4,800/day⁴) for a period of three months, apart from their entitlement for assets lost and the income restoration program. In addition, female-headed households who are subject to physical relocation shall be provided transitional assistance, including consultation support for identifying the relocation location. PAPs that are identified as vulnerable group will be prioritized in receiving the benefits of the income restoration and livelihood program.

³ <https://www.worldbank.org/en/country/myanmar/publication/poverty-report-myanmar-living-conditions-survey-2017>

⁴ Based on official daily minimum wage of 2018, by the Minimum Wage Committee of Myanmar (<https://tradingeconomics.com/myanmar/minimum-wages>)

Vulnerable households will also be encouraged to participate in the decision-making process for selection of appropriate income restoration measures and skill training programs based on their needs and preferences. During the meetings to selection of income restoration measures and skill training programs, all eligible vulnerable households shall be invited for discussions.

③ Gender Consideration

Although works and businesses of the fishery have traditionally been dominated by males, especially for large-scaled ones in offshore and deep-seas, women have carved a niche of the fishery industry in Myanmar by engaging in inland water fisheries, including aquaculture and small-scale fishery, in addition to the sale of fish harvested. This linkage to the fishery industry has provided women, not just with job opportunities, but also practical ways of supporting their families by providing protein nutrition (subsistence fishery) as well. Female-heads of the families may resort to the small-scale fishery along the Twente Canal for nutritional sustenance of their families, if not selling them for income-generation. Female merchants from poor households also tend to utilize informal mobile peddlers, because they find it hard to obtain permanent places or to have large-scale businesses. In addition, potential disruption of the irrigation from the Twente Canal and Yangon river may disproportionately disadvantage the female-headed and other vulnerable affected households if they resort to the canal and river for their daily source of water, portable and otherwise.

In a nutshell, female population among the affected groups have a high stake in relation of the implementation of the proposed project. Therefore, it is necessary that due representation and participation of the female PAPs and female-headed PAFs in all course of the information disclosure and consultation process. In particular, PEA(DWIR-PMU) is recommended to ensure the following during resettlement planning and implementation:

1. During updating the RAP, both men and women regardless of ethnicity, including informal and unregistered settlers and tenants, are invited to and fully participate in the information disclosure and consultation sessions, providing inputs to DMS, RCS and consultations on compensation and assistance. Participation rates of the male and female PAPs shall be counted and duly documented.
2. Women will be invited to discuss and finalize the income restoration measures and implementation schedule - and will be the persons to receive the income restoration assistance and implement the income restoration measures.
3. Any committees and local-level decision-making bodies on the resettlement and compensation of the proposed project shall be equally represented both by male and female citizens.
4. Performance/Progress monitoring report on the compensation, resettlement and livelihood and income restoration program shall have disaggregated indicators by gender. Post-project evaluation

of the project, if/when conducted, will also have gender-disaggregate indicators in terms of the figures of the total recipients of the compensation, assistance and livelihood programs.

④ Livelihood Restoration Plan

TOR for EIA of the proposed project which was issued by MONREC-ECD on 08 May 2019 requires establishment of RAP including livelihood restoration plans. Thus, a livelihood restoration for all severely affected households will be implemented as part of RAP implementation. Livelihood restoration activities and or support will be identified through a participatory process with each affected household. This consultation can take place during the conducting of the SES and DMS. It is important that both husband and wife are part of this participatory consultation, and following individual affected household consultations, a meeting of all affected households should be called to discuss the findings and needs for the livelihood restoration support. Results of the consultation shall be duly documented in the form of the information disclosure/consultation monitoring report and reported to the PEA, the Land Compensation and Resettlement Negotiations Committees (LCRNC). PEA (DWIR-PMU) is expected to regularly report to the Export-Import Bank of Korea, on the progress of the implementation of the livelihood restoration program as part of the environmental and social monitoring reporting.

⑤ Other Supports

Other supports will include:

- Transitional Assistance for all PAPs subject to physical relocation: Moving Support will include one-time cash compensation (based on the distance and other factors). In case the relocation site is not ready for moving by the time of relocation, the they will also be entitled to the transitional allowance (in cash), (all PAPs subject to physical relocation shall be eligible to). The case compensation amount should be sufficient to meet temporary rental expenses and other costs until occupancy is available. (WB ESS 5 Article 18)
- Income loss of the laborer based on land-based economic activities: One-time income compensation for 1 month shall be compensated to the worker/laborer before they are economically displaced. In assessing the amount of the monthly wage, documentary evidence would need to be presented. If presenting the document to prove the monthly wage is not possible. the minimum wage shall be provided.

CHAPTER 4

PLANNING AND IMPLEMENTATION PROCESS OF LAND ACQUISITION, COMPENSATION AND RESETTLEMENT

Land acquisition requires the finalization of the detailed design, based on which Detailed Measurement of Study (DMS) is carried out. Actual land acquisition and compensation takes place when the inventorization of the loss assets are finalized based on the results of the DMS and extensive consultations with the public and the affected households and communities. This RAP suffices as an initial framework for RAP. At the later stage, separate procedures related to this process shall be issued by responsible ministries. As of now, the relevant procedural laws and regulations to the land acquisition and compensation and resettlement are largely lacking, thus per EIA Procedure of Myanmar (2018), the suggested RAP will adhere to international practice and core principles on involuntary resettlements.

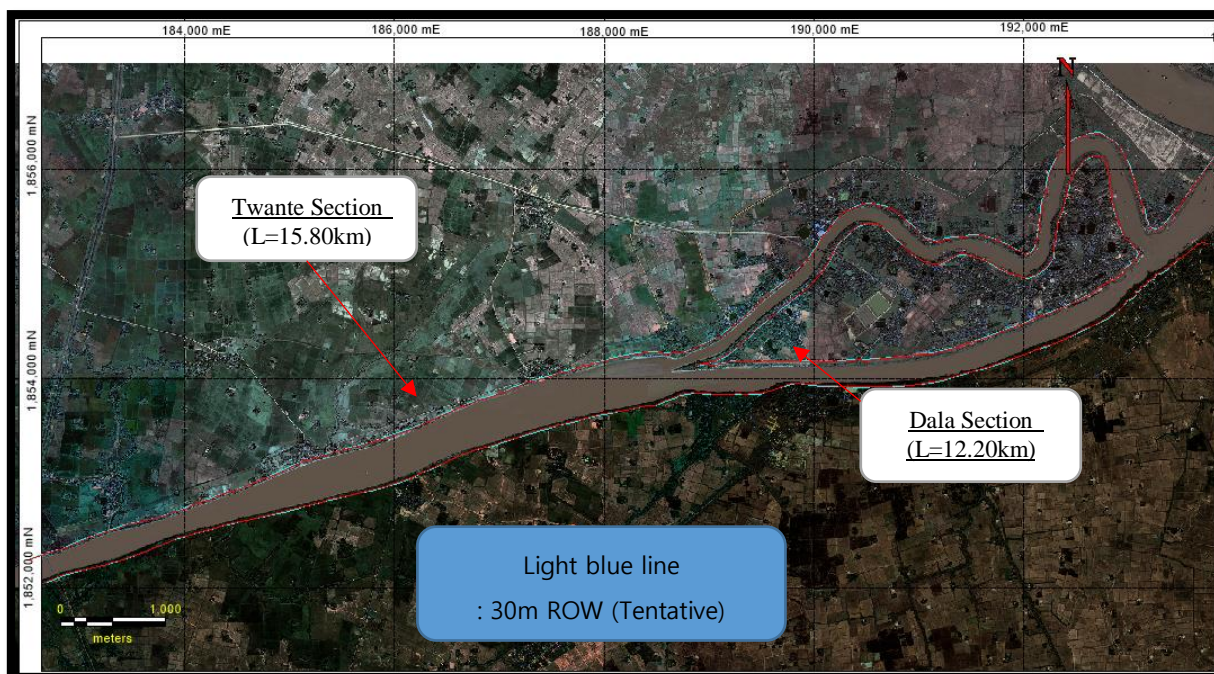

For the planning of the RAP it is noted that the current stage of the project preparation enables only an initial (framework) approach of the RAP and the concrete and final RAP need to be developed at the later stage upon the completion of the detailed design of the proposed project. Thus the presented results in the sections below, such as findings of the socio-economic survey, and inventory of loss (IOL) are only rough estimations and subject to revisions and finalization at the later phase of the project implementation.

4.1 Setting the Study Limits (AoI) for Land Acquisition and Resettlement

A. Spatial boundary for direct social impact assessment - Land acquisition and Involuntary Resettlement

Direct impacts include land acquisition (both public and private-owned land) for construction and temporary or permanent access road building. Right-of-ways of the embankment and other canal improvement works are designated to be as follows:

1. **Area 1:** ROW in Twante Section and Dala Section- Areas along, adjacent to Twante Canal, within 30 meter (Tentatively supposed 30-meter ROW before confirming AoI) from the limit of the construction site (canal improvement and embankments)

2. **Area 2:** ROW in Seikkyi Khanungto Section: As of May 2015, it was reported that there are 29 officially registered shipyards located along the Twante canal in Seikkyi Khanaungto Township (DWIR Data-2015-2016). The area is reported to cover 2,190 acres (8,962,616 sqm). In order to minimize the impacts on the shipyard business during the construction, ROW is to be drawn outskirt from the limits of the shipyard area inward to the landside, not cross-cutting the existing facilities. (The exact alignment of the ROW shall be determined later.)

B. Spatial boundary for other types of direct and indirect social impact assessment

3. **Area 3: ROW in Yangon River(MPA in charge, Kanungto, Dala, and Kyimyindaing Section) :**
ROW is tentative supposed to 30meter from the limit of the construction site of embankments.

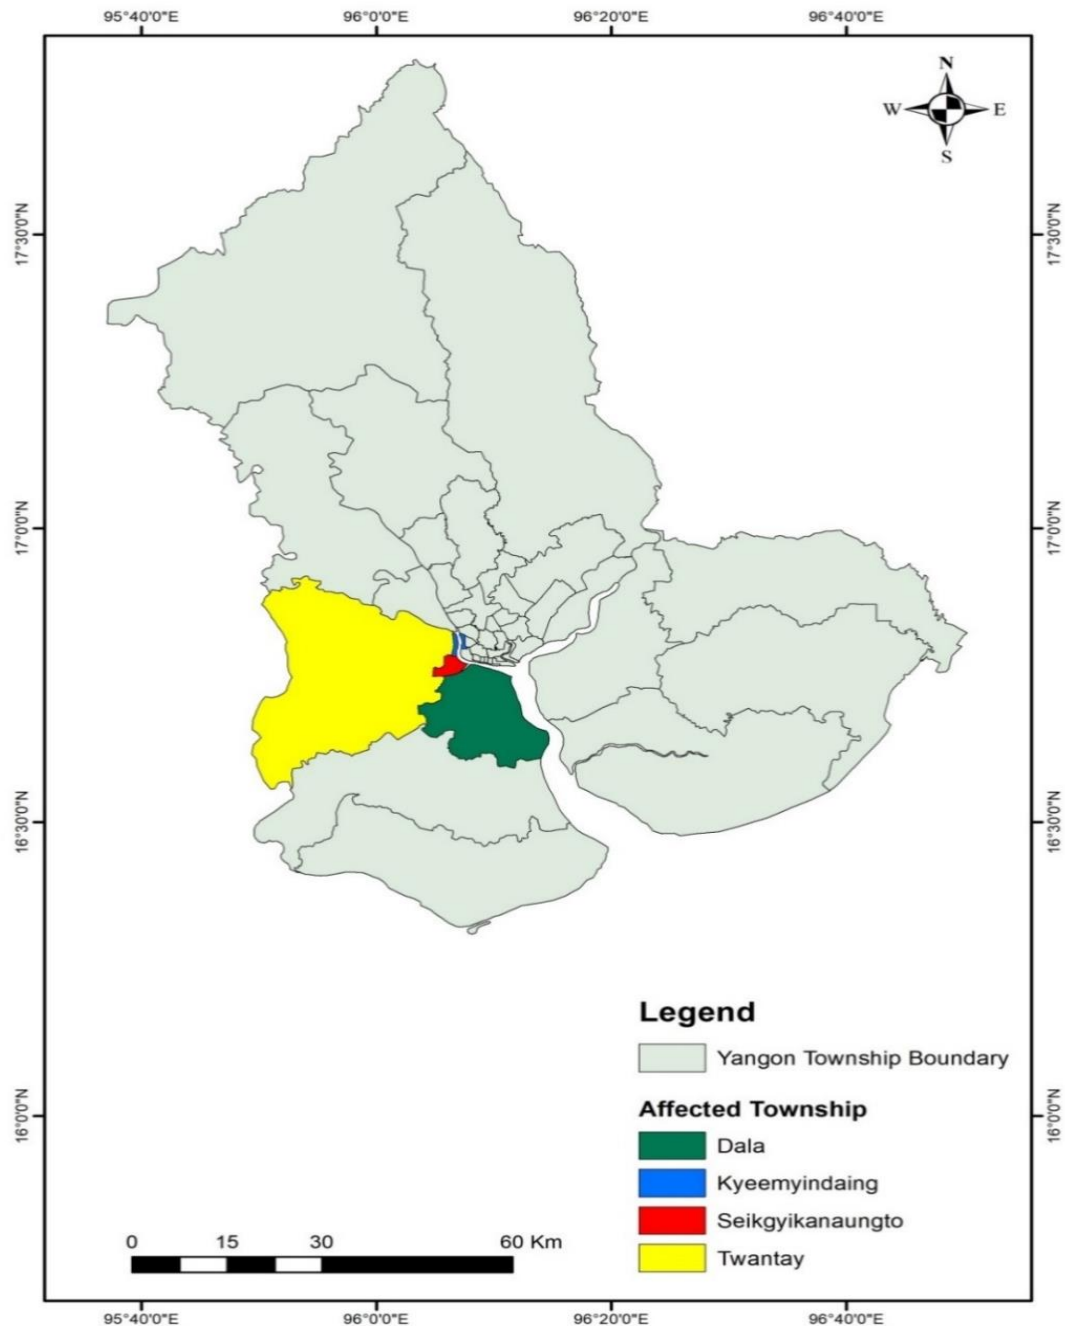

C. Spatial boundary for social impact assessment in Yangon River Section MPA in charge

In addition, geographical scopes are set for study along the administrative boundaries of the affected three Township for the social impacts such as:

- **Long-term income and livelihood and general improvement of living condition (including traffic, health and sanitation conditions etc):** While the primary beneficiaries of the project would be the inland water transport industry and the residents along the canal, the spill-over and ripple effects are expected to reach the broader community including the other residents of the affected Township. Thus the study would include the residents of the three affected Township as secondary level of beneficiaries and include them in the study as part of stakeholder engagement.
- **Temporary nuisances and disturbance in livelihood due to the noise generation, water and air and other pollution and construction-related waste generations:** While actual scope of influence may differ from item and item, the study suggest to lump the entire tboundaries of the affected four townships as the limits of this study for the convenience of assessment as well as due to the jurisdictional/administrative governance mechanism.
- **Temporary disturbance of shipyard operation businesses in SeikkyiKhanaungto Township:** The study assumes that the owners and the employees of the shipyard business in SeikkyiKhanaugto Township as part of the SeikkyiKhanaungto Township business community, regardless of their actual residential locations. Special consideration shall be given to reflect their particular concerns and socio-economic baseline conditions through the survey design and the arrangement of a focused group discussion (FGD).

- **Temporary disturbance of fishery and inland water transport business during construction:** The study assumes that the affected persons and households engaged in the fishery and inland water transport business (e.g. mini passenger boats (mini bus type business with the vessel capacity of about 20 passengers and taxi type boats (small engine boats hosting max. less than 5 passengers) and associated business holders as part of the business community of the three affected Township, regardless of their actual residential locations. Special consideration shall be given to reflect their particular concerns and socio-economic baseline conditions through the survey design and the arrangement of targeted interviews.

The following figure shows the Administrative Boundaries of the Four Affected Townships (Twante Township, SeikkyiKhanaungto Township, Kyimyindaing Township and Dala Township).

**Figure 4-1: The Administrative Boundaries of the Four Affected Townships
(Twante, SeikkyiKhanaungto, Dala and Kyimyindaing)**

4.2 Land Conformation Survey

■ Land Use Status in Study Townships

Land use status of the study townships are as shown Table 4.1. Large area is allocated for agricultural land in Twente, Dala and Kyinmyindaing Twonships. The largest ratio of agricultural land in total area is 83.8 % in Dala Township, followed by 57.4 % in Kyimyindaing Township, and 5.01 % in Twente Township. Apart from agricultural land, about 1~5 % of land is allocated for the residential area in

Twente and Dala Township while 34.4 % and 42.6 % of land is allocated for the residential area in Sekikyi Khanaungto and Kyimyindaing Township respectively.

Table 4.1 : Land Use in the Study Townships

Townships	Total Area (Acres)	Agricultural Land (Acres)	Settlement Land (Acres)	Forest and Natural Area (Acres)	Industrial Land (Acres)	Unused Land (Acres)	Fallow (Acres)	Other (Acres)
Twente	236711	118523	3456	868	102	58462	1283	54017
	(%)	50.1	1.5	0.4	*	24.7	0.5	22.8
Dala	55368	46384	2696	-	340	5688	260	-
	(%)	83.8	4.9	-	0.6	10.3	0.5	-

■ Land Confirmation Survey

According to land confirmation survey, there are 6 ward/village in Twente, 6 wards in Dala, 9 ward/village in Seikkyi Kanaungto and 3 wards in Kyimyindaing which are to be affected by the project implementation.

Township	Affected Ward/Village
Dala	<ol style="list-style-type: none"> 1. Kyaung Su 2. Tar Gyi 3. Sarbarchaung 4. Hmawset 5. Kamarkasit 6. Settmyay
Seikgyi Seikkyi Kanaungto	<ol style="list-style-type: none"> 1. Seikgyi East 2. Seikgyi West 3. Seikkyi Kanaungto East 4. Seikkyi Kanaungto West 5. ThakhinBaThaung 6. AuTunAoe 7. PanPinChaung 8. SamarDuWar 9. ChaungWineLay
Kyimyindaing	<ol style="list-style-type: none"> 1. Seik Kyi 2. U Myar 3. Nga Zin

Figure 4-2: Affected Structure and Land within the ROW in the Entire Project Area (Blue lines: ROW Boundary & Black Dots: Locations of the Structures)

Figure 4-3: Affected Structure and Land within the ROW at the Yangon River-Twente Canal junction and from Point 0 mile to Point 3.5 mile (Blue lines: ROW boundary & Red dots: locations of the structures)

Figure 4-4: Affected Structure and Land within the ROW in Twente and Seikkyi Kanaungto (Blue Lines: ROW Boundary & Red Dots: Locations of the Structures)

Figure 4-5: Affected Structure and Land within the ROW in Twente ((Blue lines: ROW Boundary & Red dots: Locations of the Structures)

Following table shows the results of the preliminary counting of the affected households, number of the structure and land ownership type by township. In total, as many as 2,697 households are found to be affected in the four affected townships with 2,028 structures (including residential and economic buildings and structures). In total about 120 hectare in is expected to be affected.

Table 4-2: Affected Households, Structures and Landowners in Project 30 m ROW

No.	Township	Households (PAFs)	Structures	Landowners
1.	Twente	479	203	276
2.	Dala	646	490	156
3.	Seikkyi Kanaungto	1220	1034	186
4.	Kyimyindaing	352	301	51
	Total	2,697	2,028	669

According to the findings, Seikkyi Kanaungto Township has a highest number of affected households, structures, with biggest portion of the land (about 120 ha) subject to land acquisition. The least affected in terms of the scale of the land acquisition and relocation impact is Twente Township.

The entire list of the PAFs subject to land acquisition is attached in Annex 1 of this report.

■ Living Environment in the Project Area

Since some part of the project area is currently used by illegal settlers, plantation and business operations such as shipyards. The PAPs living or farming in the canal area can easily take their pass ways to access to other areas for their living. Also, they can live and work without any environmental nuisance generated by human economic activity including noise and vibration. However, once construction and operations of the canal start, the everyday pass ways will be controlled for safety reason and there would be negative impact of noise and vibration nuisance generated from the construction and operation area comparing with previous living environment. Without proper control and mitigation measures to be conducted by DWIR, it is difficult to secure their safety and ensure their quality of life. In other words, incompleteness of resettlement gives significant negative impacts towards both operation/management side and the PAPs who keep living in the airport area, whereas it would be better for the PAPs to seek their new life out of the canal area with receiving proper livelihood restoration measures and a positive economic effect triggered by the Twente (Twantay) canal improvement project as well as other correlated projects. Some people used canal land for their living, cultivation, access roads and other activities.

4.3 Socio-economic Survey for Potentially Affected Persons/Households

Socio-economic survey as part of the ESIA also included the basic profiling of the potentially affected persons and households in the four affected Townships, including the following survey items:

The ESIA team will engaged key local stakeholders including the affected communities through quantitative and qualitative baseline study, focus group discussions and other participatory exercise as follows:

- Data collection including acquirement of the location map with updated demarcation of the household and land use/ownership type within the AOI ("social maps") at Township level
 - Individual household interview (Questionnaire-based household survey)
 - Semi-structured in-depth interviews with key informants, including community leaders and head of villages/wards
 - Focused group discussions (FGD) of particular interest groups among the project affected people, including: Shipyard business community, fishing community and women
 - Review activities conducted in the field and initial analysis of findings and feedbacks from key stakeholders and Project affected persons and other key local stakeholders
 - Data analysis including data entry, data cleaning, data processing, recording, feedback to key project staff
- a. Secondary Data Collection:** Baseline data gathered from the regional government (YRG) and other appropriate government and public organizations, academics and other experts in relevant fields, etc. The secondary data sources included reports, field documents, monographs, information leaflets/booklets, manuals, written order and instruction, statement of the government organization, among others.
- b. Primary data Collection:** Primary data collection through direct observations, interviews, individual/target group consultation (FGDs) to collect and verify the socio-economic conditions (demography/residence), economic status (by age, sex, education, occupation, ethnical group and income, expenditure, loan and household assets and poverty status). The social survey will be participatory in nature and carry out a series of focus group discussion (FGDs). The survey tools and methodologies considered will be developed by the Local consultant (REM) and reviewed by the Isan consortium before implementation. The study also reflects the comments and concerns in the ESIA raised by the survey respondents, participants in FGDs, interviews and other consultation activities (including the public consultation workshops).
- c. A questionnaire-based initial survey for socio-economic conditions** will be carried out during field surveys. 353 households was be selected as sample for the study with sufficient representation of each of the four affected Township sections (i.e. Dala, Twante, Kyimyindaing and SeikkyiKhanaungto), on the basis of the sampling method (Total 13% sampling out of the total potentially affected households(2,697 PAFs)) . Even representation of women and various occupational group (including shipyard, fishing and commerce communities etc.) will be ensured in setting the respondent targets.

■ Population of Twente, Dala, Seikkyi Khanaungto, and Kyimyindaing Township

The lack of publicly available demographic data for 2018 at township level is a major impediment to detailed analysis. The extensive, annually-collected, demographic data is not readily available for 2018 and the last countrywide data shared is for 2014. Figure 3.1 shows the population of Twente, Dala, Seikkyi Khanaungto, Kyimyindaing townships.

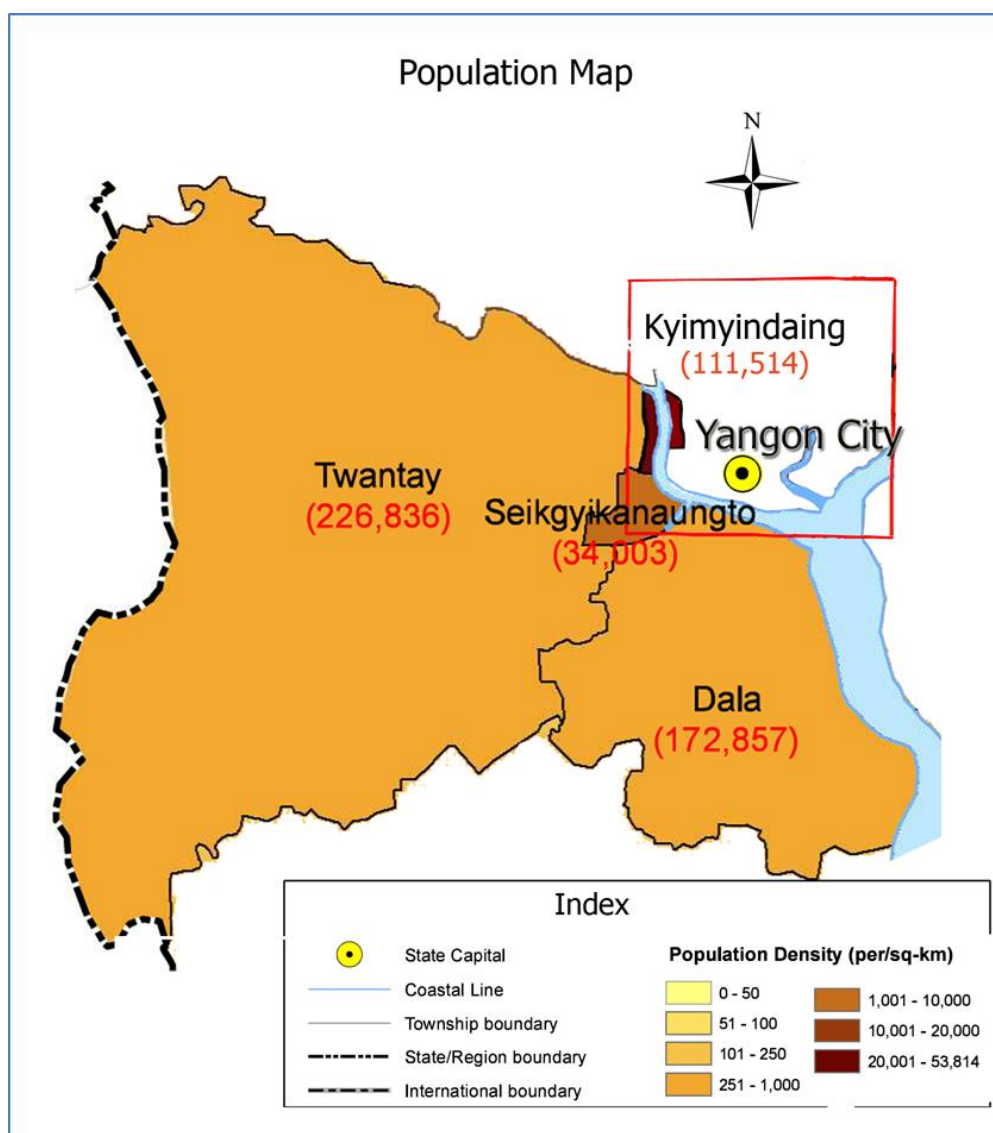

Figure 4-6: Population Map for Study Townships

Table 4-3 shows the population by sex, annual growth rate and population density of Twente, Dala, Seikkyi Khanaungto, and Kyimyindaing Townships. It indicates that the population of females exceeds the population of males in Twente, Dala, and Kyimyindaing Townships. In terms of sex ratio, the township Twente and Dala have the highest sex ratio in the region at 96 males per 100 females. The lowest sex ratio of the population is 89 males per 100 females which is lower than that of Nationwide and Yangon Region.

Table 3-1 and Figure 3-2 provide that the annual growth rate in Twente Township is 1.36% which is higher than nationwide annual growth rate of 0.88%. Kyimyindaing Township has the lowest annual growth rate at 0.30 which is lower than the national growth rate. In Seikkyi Khanaungto and Kyimyindaing Township, all populations live in urban areas.

Table 4-3: Population by Sex, Annual Growth Rate, and Population Density of Study Townships

	Population					
	Total	Male	Female	Annual Average Growth Rate	Sex Ratio (the number of males per 100 females)	Population Density (/km ²)
Twente	226,836	111,251	115,585	1.36*	96	312.9
Dala	172,857	84,671	88,186	0.75*	96	771.5
Seikkyi Khanaungto	34,003	17,068	16,935	0.78*	101	4,313.3
Kyimyindaing	111,514	52,627	58,887	0.30*	89	8,955.4

Figure 4.7: Annual Average Growth Rate

■ Initial Household Survey Results

The Twente Canal Project is located in Twente, Dala, SeikkyiKhanaungto and Kyimyindaing Townships and the household surveys were undertaken across 19wards/villages in four townships (Table 4.4) out of total 24 ward/villages that would be affected by the project. Selection of the wards/villages were made mainly based on the accessibility and limited time during the survey.353 households (out of total 2,696 PAFs: about 13% sampling) responded to the survey, with 125 male

(35%) and 228 female (65%) respondents respectively. .More females responded than male as the most part of the survey was carried out during daytime when many males, the household heads or breadwinners, were outside for work. The following table shows the detail information of the village tracts and villages in the survey area.

Table 4-4: Respondents Profile of the Village/Ward in Survey Areas

Township	Study Ward/Village	Respondents			Sampling Ratio (Out of the expected project affected households of the Township) (%)
		Male	Female	Total	-
Twente	1. Pathein 2. Sat Ka Lay 3. Thar Si 4. Sat San 5. PyawBwal Lay	57 (52%)	36 (48%)	93 (100%)	19.4% (93/479)
Dala	7. Hmaw Set 8. KyaungSu 9. Tar Gyi	16 (21%)	61 (79%)	77 (100%)	11.9% (77/646)
Seikkyi Khanaungto	10. U Tun Oh 11. Pan Pin Chaung 12. Samar Du War 13. ThaKhin Ba 14. Thaung 15. Ka Naungto (east) 16. Seikkyi (west) 17. Seikkyi (east)	45 (28%)	115 (72%)	160 (100%)	13.1% (160/1,220)
Kyimyindaing	4. Seik Kyi 5. U Myar 6. Nga Zin	7 (30%)	16 (70%)	23 (100%)	6.5% (23/352)
Total	-	125 (35%)	228 (65%)	353 (100%)	13.08% (353/2,697)

Source: Household Survey, 2018

The respondents were divided into four broad age groups, those less than 18 years (Minors), 19-35 years (Young adults), 36-50 years (Mature adults), and over 50 years (Elders). Figure 4-8 shows that Population by broad age groups in study Townships.

Table 4-5: Age Group of Respondents (%)

Township	Minors (18 years)	Young adults (19-35)	Mature Adults (36-50)	Elders (>50)
Twente	2%	42%	41%	15%
Dala	1%	19%	38%	42%
Seikkyi Khanaungto	0%	19%	37%	44%
Kyimyindaing	0%	45%	35%	30%

**Figure 4.8: Respondent comparison by Age Group in the Four Study Townships**

The following table shows that the majority of survey participants were family members, while 25 %, 35 %, 22 %, and 23 % of respondents were head of households in Twante, Dala, SeikkyiKhanaungto, and Kyimyindaing Township respectively.

Table 4-6: Respondent Percentage

Township	Head of household (%)	Family member (%)	Total
Twente	25	75	100
Dala	35	65	100
SeikkyiKhanaungto	22	78	100
Kyimyindaing	23	77	100

Source: ESIA Team's Household Survey, 2018

[Duration of Residence among Survey Respondents]

The following table indicates the duration of living in current location. 195 out of total 353 respondents (55%) reported to have lived in their current location more than 25 years while 27 respondents (7.5%) reported to live less than five years. In general, in all the four townships, the residents are long stayers in their respective locations.

Table 4-7: Duration of Living in the Location (Total respondents: 353 HHs)

Township	<5years	5-15 years	16-25 years	>25 years
Twente	7	11	14	61
Dala	7	16	19	35
SeikkyiKhanaungto	12	25	35	88
Kyimyindaing	1	7	4	11
Total	27 (7.6%)	59 (16.7%)	72 (20.4%)	195 (55.2%)

[Property Ownership Types of the Survey Respondents]

The survey asked respondents about the ownership status of their current residence. The survey results are shown in Table 4.8-12. Most of the households (323 out of 353 respondents. 91.5%) reported that they own their home, while 20 respondents (5.6%) rent and seven respondents neither own their home nor pay rent. Three respondents replied that their homes were provided by their employers. While verification by the documentary evidence is required, it is surmised that the majority of the respondents are owners of their residential land or the housing structure or both.

Table 4-9: Ownership Status of Respondents' Current Residence (Total respondents: 353 HHs)

Township	Owner	Renter	Provided by employer	Other	I don't know
Twente	93	0	0	0	0
Dala	68	3	1	5	0
SeikkyiKhanaungto	142	14	2	2	0
Kyimyindaing	20	3	0	0	0
Total	323 (91.5%)	20 (5.7%)	3 (0.8%)	7 (2%)	0

Source: Household Survey, 2018

[Debt Status of the Survey Respondents]

The survey also asked respondents about their debt status. It was found that about half of the respondents have a type of debt.

Table 4-10: Household Debt (%)

Township	Yes	No
Twente	44%	54%
Dala	51%	49%

SeikkyiKhanaungto	53%	47%
Kyimyindaing	52%	48%

Source: Household Survey, 2018

[Poverty]

In Myanmar, poverty has steadily declined since early 2000s. Myanmar is in a transition from a centrally directed economy to a market-oriented economy. This has been supported by a reform program launched by the government in 2011. Household expenditure, on average, has been increased by 15% over the past decade, enhancing the living standards of Burmese people. This can be shown in various well-being indicators, such as sales of consumer goods. For example, more than 42% of households had motorcycles in 2015, about 4 times more than that in 2009.⁵ Still, 37% of the population lives near or below the national poverty line in 2015, which means that a large portion of people continue to remain vulnerable to poverty. The country's gross domestic product (GDP) was estimated to be \$56.8 billion in 2014, approximately \$1,505 of the GDP per capital – one of the lowest in Southeast Asia (World Bank 2015).

The situation is generally worse in rural regions, 38.8% of its population in 2015, whereas only 14.5% of those in towns and cities was regarded as poor in the same year. Sectoral growth figures can explain reasons why rural poverty had been alleviated at a slower pace. Manufacturing and service sector were more rapidly grown than agricultural industry during the same period.⁶ The same pattern applies in the four affected townships: Dala and Twente Township, with a level of rural population still residing, marks the less socio-economic development level compared with 100% urbanized SeikkyiKanaungto and Kyimingtine Township. With the advancement of the SUDP and Yangon City Development Plan, the former Township are expected to mark visible socio-economic development with higher income levels with rapid urbanization in the future.

Households in poverty tend to make their livings through agriculture, in most cases either as laborers or as small farmers. Even when they are farming, most of them do not have their own land. Besides, poor people are likely to be distant from the formal economy, including public credit services or market transactions. They are also less likely to be highly educated, both household heads and working age members. All of these factors are closely correlated with low income levels.

Identification of low income group of PAPs/PAFs would need to be made at the later stage once the IOL is validated and finalized upon the completion of design of the project. It is recommended that PEA

⁵ The World Bank (2017) Myanmar Poverty Assessment

⁶The World Bank (2017) Myanmar Poverty Assessment

(DWIR-PMU) establish a special mitigation measures for this group of vulnerability, such as extending the vulnerability allowances and/or income and livelihood restoration.

[Ethnicity and Religion]

Household Survey Results indicates that the majority of the respondents are Bamar while 13 respondents are Kayin (Table 4-11 and Figure 4-9).

Table 4-11: Respondents by Ethnicity in Study/Focus Areas

Township	Bamar	Mon	Shan	Kayin	Others
Twente	369	0	0	9	0
Dala	341	3	0	0	16
SeikkyiKhanaungto	714	1	0	4	0
Kyimyindaing	97	0	0	0	3
Total	1521	4	0	13	19

Source: Household Survey, 2018

Source: Household Survey, 2018

Figure 4-9: Respondents by Ethnicity in Study/Focus Areas

[Literacy and Education]

The following table indicates that the literacy rate of respondents in Dala Township is 90% while the literacy rate of respondents in SeikkyiKhanaungto Township is 68%. Twente, SeikkyiKhanaungto, and Kyimyindaing Township have lower literacy rate than that of national average (89.5 %).

Table 4-12: Respondents by Literacy Rate in Study/Focus Areas

Township	Literate (%)	Male (%)	Female (%)
Myanmar	89.5	-	-
Twente	88	45	43
Dala	90	48	42
Seikkyi Khanaungto	68	36	32
Kyimyindaing	81	41	40

Source: Household Survey, 2018

Table 4-13 shows the education facilities in study townships. Twente has eight state high schools, 22 state middle schools, 183 state primary schools, two preschools, and one monastery education center. There are no universities and colleges in Twente.

Dala has four state high schools, seven state middle schools, 53 state primary schools, three preschool and three monastery education centers.

Seikkyi Khanaungto has two state high schools, one state middle school, 14 state primary schools, and one preschool.

Kyimyindaing has seven state high schools, five state middle schools, 11 state primary schools, 13 preschools, and two monastery education centers.

There are no universities and colleges in those four townships.

Table 4-13: The Education Facilities in the Four Affected Townships

Name of Township	No.of University/ College	No.of High School	No. of Middle School	No.of Primary School	No.of Pre School	Monastery Education School
Twente	0	8	22	183	2	1
Dala	0	4	7	53	3	3
Seikkyi Khanaungto	0	2	1	14	1	0
Kyimyindain	0	7	5	11	13	2

Source: General Administrative Department, 2017

The total population in study townships is 517,747(the proportion of aged 15 and over is 374,622) and the number of educational facilities is 330, which means that the number of educational facilities is insufficient compared to the total population. In particular, with the exception of primary schools in Twente, the total number of educational facilities is 147, which means that more educational facilities are expected to be needed as a proportion of the population in study townships. In the case of Seikkyi Khanaungto and Kyimyindain, the proportion of children aged 14 and below who need basic education is 3,286 and 25,076 with the number of pre-schools, primary school and middle school in each township is 16 and 19.

According to the household survey, the literacy rate of Seikkyi Khanaungto is 68 percent and that of Kyimyindain is 81 percent, which is lower than 88 percent in Twente and 90 percent in Dala. The average literacy rate of Myanmar is 89.5%. While further study is required to clarify the reason for visibly low rate of the reported literacy rates among the respondents in Seikki Kanaungto and Kyimyindain of our household survey, it is possible that adult family members may have been absent during the household survey due to their work outside - being 100% urban population there are no farmers whose presence at residence areas are more likely during the work days, that junior population may have responded.

[Income Level]

The following Table 4-14 indicates that the highest average individual annual income is estimated as 2,632,255.9 Kyats for Kyimyindaing Township and Dala Township has lowest average individual annual income.

Table 4-14: The Average Individual Annual Income Status of Study Townships (Unit: Kyat)

Township	2014-15	2015-16	2016-17
Twente	1,651,514	1,688,712	1,725,910
Dala	443,442	558,776	674,110
SeikkyiKanaungto	786,032	857,994	1,091,608
Kyinmyindaing	1,882,711.6	2,014,485.7	2,632,255.9

Source: General Administrative Department, 2017

Household Survey Results

As can be seen in the following table, most of the households (196 out of 353 households) reported an income of between 1,100,000-3,600,000 Kyats. Four households reported an income of less than 1,000,000 Kyats and 56 households reported an income of more than 6,000,000 Kyats.

Table 4-15: Annual Income of Survey Results (Total respondents: 353 HHs)

Income Rate				Unit: Kyat
Township	<1000000	1100000-3600000	3700000-6000000	>6000000
Twente	0	54	26	13
Dala	0	37	23	17
Seikkyi Khanaungto	3	90	43	24
Kyimyindaing	1	15	5	2
Total	4(1.1%)	196(55.5%)	97(27.5%)	56(15.9%)

Source: Household Survey, 2018

According to the household surveys, Table 4.16 indicates that 28 out of 353 households reported an annual expenditure of more than 5,000,000 Kyats while 201 households reported an annual expenditure between 1,000,000-3,000,000 Kyats.

Table 4-16: Annual Expenditure of Survey Results (Total respondents: 353 HHs)

				Unit: Kyat

Seikkyi Khanaungto	3	86	62	9
Kyimyindaing	1	11	9	2
Total	6 (1.7%)	201 (57%)	118 (33.4%)	28 (7.9%)

Source: Household Survey, 2018

In term of income sources, agriculture, including livestock and fishery is most important sector for Myanmar's economy. As can be seen from the following Table 4-17, the main sources of income in Study Townships are agriculture, fishery and official employment of the government.

Table 4-17: Existing Status of Local Livelihoods in Townships

Township	Working-age Population (aged 15+)	Government Staff (%)	Service Staff (%)	Agriculture (%)	Livestock (%)	Sales (%)	Trader (%)	Fishery (%)	Odd Job (%)	Other (%)

[Economic Infrastructure by Township]

Twente Township is located in Yangon region and is an economically developing township. Township local people tend to operate mainly for agriculture. In addition, has the breeding business. Twente Township can transport to other township by road, by water and waterway and good transportation. The main township's main products are rice and exported to other parts. The economic status, occupational status, income status and other social infrastructures are shown in Table 4-18.

Table 4-18: The Economic Facilities of Twente Township (as of April 2017)

No.	Name of Township	No. of factories	No. of Workshops	No. of Small scale/ domestic enterprises	Total
1	Twente	68	2 (car repair shops)	55	125

Source: General Administrative Department, Twente Township (2017)

Dala Township located in Yangon region and is also the commercial city. The local people are mainly doing agriculture and services. The economic status, occupational status, income status and other social infrastructures are shown in Table 4-19.

Table 4-19: The Economic Facilities of Dala Township (as of March 2017)

No.	Name of Township	No. of factories	No. of Workshops	No. of Small scale/ domestic enterprises	Total

Seikkyi Khanaungto is located in Yangon Township and that economic growth is slowing Township local people mainly work agriculture and causal. Township only use transportation for water, if create for employment opportunities and services the residents could be living the high living standard and will be developed faster. The economic status, occupational status, income status and other social infrastructures are shown in Table 4-20.

Kyimyindaing Township has a relatively small scale of economy. Township is also located on the intersection of the road and water access and good transportation. Most workers are either casual workers. The economic status, occupational status, income status and other social infrastructures are shown in Table 4-21.

Table 4-21: The Economic Facilities of Kyimyindaing Township (as of April 2017)

■ Disturbance of Shipyard business operations in Seikkyi Kanaungto Section

As of 2015, 29 shipyards are found to be registered in Seikkyi Kanaungto Section. The shipyards in Seikkyi Kanaungto section serve to build, repair and disintegrate the vessels for inland water transport. The shipyard facilities have been established in this region since 1960s and the FGD in December 2018 with the shipyard operation community reported that it is reported that there are about 40 shipyards currently in operation, out of which 32 shipyards are owned and run by private owners and the 8 shipyards by MPA. On the average one shipyard company is hiring about 10 employees based on a daily labor basis (with 12,000~15,000 kyat for daily wage).

Although the shipyard operations are recognized *de facto* by the Myanmar government, *de jure* recognition is not clear: According to the Kanaungto Shipyard Association, an interest group of the shipyard business owners and operators, the Association has been paying the "fees" to the Myanmar government according to The Canal Act [BURMA ACT II. 1905]. With the new civilian government taking the power in 2015, they stopped paying the fees. It is found that formal licenses have not been issued to the shipyard owners.

While the official mandate for the canal management for inland water transport lies with the DWIR, the Shipyard association claimed that regular canal maintenance (such as regular sedimentation clearing through dredging etc.) have been carried out by the shipyard operators themselves on their own costs.

According to the land confirmation survey, the large portion of the areas (1.1286 ha with 29 shipyards) where the shipyard facilities are located belong to the category of canal land under the DWIR ownership.

Typical structure of the shipyard facilities includes a machine shop, a pipe and boiler shop, warehouse plate, carpenter shop and slipways (see the picture below). The shipyards in Kanagunto Section are relatively of small scale (with 1.1286 ha occupancy on the average) which deals with the small and medium size vessels. It was observed that in Twente canal area, painting and repairing of the vessels are often done at the slipway or dry dock in an open air. (See the pictures below.)

Figure 4-10: Images of shipyard operations in Dala Township
(source: alamy stock photo, www.alamy.com)

The size and structures of each of the shipyards are shown in the following table:

Table 4-22: List of Shipyards in Affected Areas

28	Seikkyi Kanaungto	0.0248
29	Seikkyi Kanaungto	0.0368
	Total	1.1286

Concerns have been raised during FGD and public consultations sessions regarding potential disturbance of the shipyard operations by the project implementation. Currently, DWIR holds a position that the shipyard facilities would not be disturbed, and their business operations should be able to continue during construction without stoppage, as ROW for the construction would not be drawn to dissect the shipyard areas. However, until now DWIR has not determined the exact demarcation of the ROW in Seikkyi Kanaungto Section.

■ Loss of Income and Business Opportunities

Another group to be affected by the project implementation includes those whose source of income and livelihood are significantly dependent upon the Twente Canal and the adjacent land to the canal subject to acquisition. This include, among others, owners of crops and fruit (and other commercial) trees, agricultural workers (sharecroppers and sustenance farmers), people running small boat crossing enterprises (mini boat bus and taxis) and their employees, etc.

First of all, total 92 ha of the affected land are farming land (mostly rice and small farming). Owners of crops and fruit (and other commercial) trees and other resources that are attached to the land that are to be taken for construction and ROW, would need to be compensated based on the replacement cost principle (which includes both the current market price of the assets and the transaction costs). Agricultural workers based on labor contract, be it sharecroppers with or without any written (legal) contractual documents, whose livelihood is predominantly dependent upon the sharecropping on the affected land, are likely to lose their means of livelihood, constituting the primary vulnerable group, during the detailed measurement study (DMS), the project proponent would need to count the number of the sharecropping households on the affected land, provide disturbance allowances to minimize the negative impacts upon the group. Compensation should be made in accordance with relevant laws and regulations in Myanmar and the EDCF Safeguard Policy and other internationally recognized safeguard policies (such as WB OP/BP 4.12).

Small boat business community include small boat owners, boat minibus and taxi operators and their employees (staff onboard, ticket-office clerk, etc.) along the canal and Yangon river (project area). According to information source from DWIR, a number of boat taxis and boat buses are being operated a day along the Twente Canal, catering about a huge number of passengers a day. Currently, there are about 15 boat bus and taxi stops along the Yangon river and the Canal (project area) (See the map below).

Table 4-23: Inland Water Transport Services Routes in Myanmar

Sr.	Division/Route	Schedule
1.	Yangon – Dala	Daily (46) trips
2.	Wadan – Dala	Daily (19) trips & 9 trips in Sunday
3.	Yangon – Seikkyi Kanaungto	Daily (8) trips & 6 trip in Sunday
4.	<i>Sintohtan – Sarparchaung</i>	<i>Suspended</i>
5.	<i>Wadan – Saikgyi</i>	<i>Suspended</i>

While commercial fishing is not officially allowed in Yangon River and Twente Canal, it is reported that about several hundred people are still practicing fishing in the river and the canal. In effect, fishing practice is condoned by the authority and a significant number of households are making a living partially, if not entirely, from fishing. There is no existent data on the actual scale of the fishing community in Yangon River or Twente canal.

This project is, however, unlikely to make significant impacts on the fishing community as the construction work is largely focused on the canal side, not the canal itself. Fishing is a mobile activity, in bed scouring area, fishermen could simply move to alternative location for fishing as the fish swam would also alter their movement tracks away from the construction site.

During the focused group discussion with farmers, it was also found that some farming lands are using the river and canal water for irrigation through pumping and piping. In case their waterway is temporary/permanent blocked due to the construction work, alternative channel and water way would need to be provided by the project proponent/contractor to ensure continued farming activities.

Negative impacts on their income and business opportunities, however, are judged to be locally contained and temporary. One way to minimize the disturbance due to the construction is to sequentially sectioning out area by area for construction work. In this way, those whose passage to the river is blocked by construction, could make avail of alternative passages during construction. Project proponent may need to arrange for alternative route to access the canal, in case any pier or boat bus/taxi stops are to be closed due to construction work.

4.4 Detailed Measurement Survey (DMS)

A. Inventory of Losses (IOL)

The IOL for the proposed project listed below is based on the preliminary design and the socio-economic survey of the potential affected persons/households based on the preliminary design and ROW assumption as of the date of writing this plan. Finalization of the IOL will be made upon the completion of the DED and DMS (which will be explained in the sections below).

The IOL should cover all fixed assets (i.e. land used for residence, commerce, agriculture including ponds; dwelling units; stalls and shops; miscellaneous structures such as fences, tombs, and wells; tress with commercial value; crops; etc.), which are located in the project construction area. These will be identified, tagged, measured and their owners, and users if a different party, identified. International Safeguard Standards, such as ADB SPS, stipulate that when asset owners and asset users are different people and both are affected, it is possible that both are entitled to some compensation. Socio-economic conditions of the identified households including source of livelihood, income level, and ownership of productive assets will also be gathered as part of the IOL. Final IOL is to be conducted by staff of the provincial and district departments of agriculture (PAFO and DAFO) and local authorities with support of village representatives and in collaboration with the feasibility study consultants.

B. Detailed Measurement Study (DMS)

Once the detailed engineering design(DED) is approved, the detailed measurement study (DMS) finalizes and validates the results of the Inveontory of loss(IOL), severity of impacts and list of affected households due to the project implementation. The final cost of resettlment for the project will be determinedfollowing the completion of DMS.

Cut-off date for eligibility is the date after which people will not be eligible for compensation or assistance. As a rule of thumb, the cut-off date for eligibility is set by the PEA as a date when the first offical information disclosure of the project to the public is made. In the proposed project, the official cut-off date has been originally set to be 31 July 2018.

During the DMS, data will be collected on the followingassets from100% of PAP/PAFs following DED. The data collected during DMS constitute a formal basis for determining the PAP/PAFs entitlement to compensation and other types of assistance and levels of compensation. For each of PAP/PAF,the scope of the data will include:

- (i) Total and affected areas of land, by type of land assets,
- (ii) Total and affectedareas of structures, by type of structure (main or secondary)
- (iii) Legal status of affected land and structure assets,and duration of tenure and ownership

- (iv) Quantity and types of affected crops and trees
- (v) Quantity of other losses, e.g. business or other income, jobs or other productive assets, estimated daily net income from informal shops
- (vi) Quantity/area of affected community property, community or public assets, by type
- (vii) Summary data on PAP/PAF households, by ethnicity, gender of head of household, household size, primary and secondary data source of household income viz-a-viz poverty line, income level, whether household is headed by women, elderly, disabled, poorer indigenous peoples
- (viii) Identify whether affected land or source of income is primary source of income; and
- (ix) PAP/PAF knowledge of the proposed project and their preferences for compensation and, as required, relocation sites and rehabilitation measures

4.5 Replacement Cost Survey (RCS)

A. Market survey

According to the market survey, REM Team went to collect the market survey in each township on 12th to 14th December 2018.

Sr.	Township	(A) Land category (*)	(B) Size	(C) Price (Lakh)	(D) Location of land (*)	(E) Structure or not (*)	(I) Year of price
1	Dala	2	1 Acre	900 - 1000	1	1	2018
		1	20'x50'	500 - 1000	1	3	2018
		1	20'x50'	200 - 400	2	2	2018
		1	20'x50'	150 - 200	3	2	2018
2	Twente	2	1 Acre	200 - 500	1	1	2018
		4	1 Acre	100 - 150	1	1	2018
		4	1 Acre	70 - 100	2	1	2018
		1	40'x60'	500 - 1000	1	3	2018
		1	40'x60'	200 - 500	2	2	2018
		1	40'x60'	70 - 200	3	2	2018
3	Seikgyi khanaungto	1	25'x50'	200 - 400	1	3	2018
		1	25'x50'	150 - 200	2	2	2018
		1	25'x50'	80 - 150	3	2	2018
		4	300'x300'	500 - 800	4	1	2018
4	Kyimyindaing	1	10'x20'	50 - 70	3	2	2018
		1	20'x40'	70 - 150	3	3	2018
		1	40'x60'	150 - 250	3	3	2018

[*Code]

(A) Land category: 1. Residential land, 2. Paddy field, 3. Dry field, 4. Orchard land, 5. Others (specify)

(D) Location of land:

1. Facing the main road, 2. Not facing road but near the main road, 3. Inside the village area, 4. Others (specify)

(E) Structure or not

1. No structure, 2. with 1 story house, 3. With 2 stories house, 4. With more than 3 stories house, 5. Others (specify)

Figure 4.11: Images of Market Survey Activities carried out by Local Assessment Team (REM)

B. Replacement Cost Survey (RCS)

The replacement cost survey (RCS) will be carried out in parallel with DMS and SES activities by collecting information from both secondary and primary sources (direct interviews with people in the affected area, material suppliers, house contractors), and from both those affected and those not affected. Government rates based on the market survey shall be adjusted, as necessary, in order to reflect the full replacement cost as much as possible.

Land Acquisition Act of Myanmar (1894) does not mention explicitly the adoption of the replacement cost compensation but the Section 23(1) indicates that various other factors need to be taken into account in addition to the market value for land and damaged crops. To specify:

Sections	Key provisions of the LAA (1894)
Section 23(1)	[Calculation of the Compensation Amount] Requires the award of compensation for owners for acquired land to be determined at its market value taking into consideration: i) market value of the land at the date of publication of the notice; ii) damages caused to any standing crops or trees; iii) adverse impacts due to severance of the affected land from other land; iv) adverse impacts on other assets, moveable or immovable; v) causing displacement of residence or place of business due to acquisition; and vi) loss of profits due to the time lag between the notice served under section 6 and time of taking possession of the land.
Section 23(2)	Provides an additional 15% on the assessed market value in view of the compulsory nature of the acquisition for public purposes.

Section 11	<p>[Enquiry into Measurements, Value and Claims, and Award by the Collector]</p> <p>11. On the day so fixed, or on any other day to which the enquiry has been adjourned, the Collector shall proceed to enquire into the objections (if any) which any person interested has stated pursuant to a notice given under section 9 to the measurements made under section 8, and into the value of the land at the date of the publication of the notification under section 4, sub-section (1) and into the respective interests of the persons claiming the compensation, and shall make an award under his hand of:</p> <p>(i) the true area of the land; (ii) the compensation which in his opinion should be allowed for the land; and (iii) the apportionment of the said compensation among all the persons known or believed to be interested in the land, of whom, or of whose claims, he has information, whether or not they have respectively appeared before him</p>
------------	--

Although the LAA requires payment of compensation and illustrate a list of considerations (i)~Vi) of the Section 22(1) of the LAA (1894)) in determining the market value, any specific methodology for determining compensation for affected land and other assets are lacking (See Section 11 of the LAA (1894)). Calculation of the market value of lands and other assets for the project, once carried out by the valuer, will need to be reviewed and validated by Land Compensation and Resettlement Negotiations Committees (LCRNC).

In principle, compensation will be based on the principle of full replacement cost and market value for all affected properties of land and non-land types, whichever is appropriate and most favorable to the affected household for the asset concerned.

With the possible time lapse between the time for initial survey and the actual time for compensation, updates are required to realize the actual replacement cost at the time of compensation to individual PAPs/PAFs.

4.6 Entitlement Matrix

Entitlement refers to a range of measures (i.e. compensation and/or other assistances as set forth and agreed in the Entitlement Matrix), which are provided to affected households, depending on the type and severity of their losses, to restore their economic and social base (ADB definition). Below is a suggestive matrix for the proposed project for the DWIR's consideration for adoption:

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
Permanent Loss				
A. Loss of Land and Land Use Right				

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
Loss of Land	Legal title holder/owner of residential, agricultural, or commercial land	<p>(A1)</p> <ul style="list-style-type: none"> ·Cash compensation at replacement cost for purchase of land in similar condition to the lost land will be provided. ·Replacement land compensation (similar condition) will be provided if requested. 	<ul style="list-style-type: none"> • For more than 10% of the farming land and if more than 20% of the residential land are taken (severely affected PAPs/PAFs), compensation for the entire lot shall be compensated. • If less than 10% of agricultural land and less than 20% of residential land are taken ("partial loss of land"), partial compensation shall be made based on the actual size of the lots that are to be taken. In case of partial loss of land, if the remaining land is no longer viable for continued use, compensation for entire land holding at replacement cost. • For acquisition of the (esp. farming) land, land-for-land compensation option shall be provided as a top priority if available in the area, as much as possible in addition to the cash compensation so that the affected farming family can freely choose. • In case of replacement land compensation, infrastructure such as power, gas, water, access road etc. shall be facilitated before actual relocation. • An additional 15% on the assessed market value will be paid as required by national law for 	<p>(Evaluation, Payment)</p> <p>YRG</p> <p>(Land to Land Compensation)</p> <p>YRG</p>

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
			<p>compulsory nature of the acquisition.</p> <ul style="list-style-type: none"> Exemption from paying tax on compensation and administrative cost for the affected land. The project will assist affected people in getting the residual land registered. Severely affected households will be entitled to a transition allowance (allowance for severely affected households (Refer to Row 9 of this entitlement matrix)) Severely affected or vulnerable household will be entitled to receive livelihood restoration support 	
	Unauthorized occupants of residential, agricultural, or commercial land	<p>(A2)</p> <p>·No compensation for loss of land will be provided to unauthorized occupants of public land.</p>	<p>- Assistance of livelihood restoration will be provided to unauthorized occupants.</p> <p>·Included are unauthorized occupants who received previous compensation yet continue to occupy the land. (Illegal Squatter)</p>	Xxx
Loss of Land Use Right	Land users with legal land use certificate or equivalent right to use residential, agricultural, or commercial land	<p>(A3)</p> <p>·Cash compensation at original cost to obtain the land use right will be provided.</p> <p>·New land use right will be provided that assures livelihood or business environment similar to lost land, if requested.</p>	<p>·Eligibility of certificate holder will be determined by either legal registration document for land use right or tax certificate.</p> <p>·In case original cost for the land use right cannot be established, registration fee for land use right in the applicable region will be provided.</p>	<p>(Evaluation, Payment)</p> <p>YRG</p>

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
	Unauthorized land user of residential, agricultural, or commercial land	(A4) ·No compensation for loss of land use right will be provided to unauthorized users of public land.	·Assistance of livelihood restoration will be provided to unauthorized land users. ·Included are unauthorized land users who received previous compensation for land use rights yet continue to use the land.	Xxx
B. Loss of Structure				
Loss of structures including residential houses, commercial office, or accompanying structures such as retaining walls	Owner of structures	(B1) • ·Cash compensation at replacement cost based on actual market price of materials and cost of labor for dismantling, transfer, and rebuild. No deduction for depreciation or the remaining values of salvageable materials. Or where structure can be moved, cash and/or in-kind assistance to move and repair affected structure. ·Reconstruction of lost structures in similar condition will be provided if requested.	·In determining the compensation of structures, depreciation of the asset and the value of salvageable materials will not be taken into account. ·Removal of affected structures will be conducted by DWIR. This does not apply in case that entitled persons remove the structures, either partial or a whole, at their own expenses. -No compensation will be provided to the ones who have previously received appropriate compensation for the structures. -Assistance of livelihood restoration will be provided to those ineligible for compensation. • For partially affected main structures (with less than 10% of their total productive assets are lost), in addition to compensation for affected part of the structures, entitled to allowance to repair remaining portion of structure.	(Evaluation, Payment) YRG (Removal) DWIR

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
			<ul style="list-style-type: none"> • In addition 15% on the assessed market value will be paid as required by national law for compulsory nature of the acquisition • Affected people assisted in getting necessary approvals for re-installation of any affected utilities like electricity, telephone, and/or water connections or compensation paid in cash based on prevailing cost of disconnection and re-installation • For partially affected main structures (with less than 10% of their total productive assets are lost), in addition to compensation for affected part of the structures, entitled to allowance to repair remaining portion of structure. • In addition 15% on the assessed market value will be paid as required by national law for compulsory nature of the acquisition • Affected people assisted in getting necessary approvals for re-installation of any affected utilities like electricity, telephone, and/or water connections or compensation paid in cash based on prevailing cost of disconnection and re-installation 	

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
Loss of social service facility such as monastery	Representative of facility manager	(B2) ·Social service facility such as a monastery will be rebuilt to original or better condition in size and quality in the vicinity.	·Details of compensation shall be determined by clarifying current use of facility through consultation with representative of the facility manager.	(Evaluation, Reconstruction) YRG
C. Other Loss (Crops, Trees etc.)				
Loss of crops	Representative of farm land user (both legal and unauthorized)	(C1) ·Cash compensation at whole sale prices of crops before harvest on the affected agricultural land will be provided. Or Alternatively: <ul style="list-style-type: none"> For annual crops, affected people will be given 4 months' notice to pick crops prior to clearance. For crops that cannot be harvested, affected people will be awarded the full market value of production lost. Cash assistance equivalent to 6 years value of paddy in areas which affected people can no longer cultivate. Other possible forms of assistance, if needed, in consultation with government authorities and households during updating of the resettlement plan to support restoration of livelihoods. 	·Compensation will be paid regardless of legal or unauthorized land owner and user. ·In case of animal husbandry, no loss of livestock is applicable since livestock is not immovable. Provision of the right to operate animal husbandry as in 'A3'.	(Evaluation, Payment) YRG
Loss of Perennial Crops and Trees	Owners of affected trees: (i) Rubber, timber, and fruit trees (ii) Private shade	<ul style="list-style-type: none"> Cash compensation at market price for loss of crops/fruits calculated as 	<ul style="list-style-type: none"> Replacement of saplings up to a factor of 15 new to one old tree included in the compensation. 	YRG

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
	trees	number of years needed to bear fruit.	Wood value considered for applicable trees.	
D. Assistance for Restoration Livelihood				
Assistance for moving cost	Household head of PAPs who needs physical relocation	(D1) ·Cash assistance for moving cost estimated on required moving expenses will be provided.	·Cash assistance for a single moving activity will be provided. ·Estimation arrangement in an early stage with PAPs will be required since the assistance amount depends on the distance to a relocation site.	(Evaluation, Payment) YRG
Assistance for income loss associated with loss of land or land use right	Household head of PAPs who loses agricultural income	(D2) ·Cash assistance equivalent to the price of 2 crop yields on the affected agricultural farm at whole sale prices will be provided. ·Consultation support in finding new destination for agricultural farm will be provided. ·Livelihood restoration assistance will be implemented through income restoration/improvement programs including vocational training if needed.	·Cash assistance will be provided regardless of legal or unauthorized land owner and user. ·No assistance will be applied for livestock industry since no significant loss or damage resulted in income loss is expected for livestock relocation.	(Evaluation, Payment) YRG
	Employee who loses income from farm work or other job	(D3) ·Cash assistance equivalent to 1 month (30 days) income, monthly amount of annual net income of the year before displacement, will be provided.	·Attention must be paid that entitled persons are eligible to severance pay per Myanmar's Labor Laws. ·Document certifying employee's income will be examined in evaluating cash assistance. ·In case above document is not available, cash assistance will be evaluated based on	(Evaluation, Payment) YRG

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
			minimum wage with consultation with the entitled person.	
Assistance to vulnerable persons	Head of household with a disabled member	(D4) ·Cash assistance equivalent to 1 month (30 days) of minimum wage will be provided.	·A disabled person is defined as one with physical disability or with difficulties due to old age. ·Assistance amount would be estimated from the minimum wage of Myanmar of 2018, 4,800MMK/day. ⁷	(Evaluation, Payment) YRG
	Female-headed household or head of household below poverty line	(D5) ·Cash assistance equivalent to 1 month (30 days) of minimum wage will be provided. ·Consultation support in finding new relocation destination will be provided. ·Livelihood restoration assistance will be implemented through income restoration/improvement programs including vocational training.	·Poverty household is defined as the household which is below the poverty line ⁸ (431,795MMK/year for average adult individual income) ·Assistance amount will be estimated from the minimum wage of Myanmar of 2018, 4,800MMK/day.	(Evaluation, Consultation, Payment) YRG
6. Loss of business incomes	Owner with or without title	Cash allowance equivalent to 1-month income ⁹ .	<ul style="list-style-type: none"> The allowance may be extended monthly for the transitional period up to 6 months in cases where the business needs to relocate to another location. 	YRG

(<https://tradingeconomics.com/myanmar/minimum-wages>)

⁸ An ADB Land Acquisition and Resettlement Framework for Myanmar: Climate-Friendly Agribusiness Value Chains Sector Project, published in 2018, defines the minimum subsistence as MMK1,183 per day or monthly MMK 35,490 based on poverty rate of \$1.25 per day per person.

⁹ As reflected in tax receipts. For those without tax receipts, the income of similar proxy businesses will be used for shop owners.

Type of Loss	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
7. Loss of employment	Employees of Businesses (incl. shipyard workers), affected agricultural workers,	<ul style="list-style-type: none"> Cash allowance equivalent to 1-month income in project areas. 	<ul style="list-style-type: none"> If an affected household is severely affected, entitled to receive livelihood restoration support (See Section E) and transition allowance (See Row 9) If possible, job trainings (related to construction of the project etc.) for the laid-offs 	YRG

Temporary Loss				
Loss type	Entitled Persons	Entitlement	Implementation Issues	Implementation Institution
Temporary acquisition or easement during construction or for camp/storage, etc.	Affected people or affected household with formal legal rights or recognizable rights under the law	<ul style="list-style-type: none"> Monthly cash compensation to cover income opportunity lost and restoration of land (leveling, drainage, fertilizer etc.) of land and/or structures to pre-project levels. 	<ul style="list-style-type: none"> Affected asset to be fully restored within 1 month of return to owner. DWIR-PMU will inform the public at least 45 days before the start of civil works/excavation activities. The contractor will ensure that the excavation of trenches and other civil work activities are carried in a systematic manner and least inconvenience to general public and roadside property owners. Contractors will make arrangements to minimize traffic obstructions and facilitate smooth flow of traffic. 	<ul style="list-style-type: none"> YRG
	Users without formal rights to the land	<ul style="list-style-type: none"> Cash compensation for non-land assets (standing crops, trees, structures) at replacement cost 	.	<ul style="list-style-type: none">

4.7 Assistance for Livelihood Restoration of the PAPs/PAFs and the affected communities

Although the proposed project aims to avoid negative impacts on the livelihood of the PAPs/PAFs and the affected community, it is possible that some households could be severely affected by losing 10%

or more of their productive land or other assets, or impacts affect vulnerable households. If so, an income improvement program needs to be designed and provided. The income improvement program will be designed in a participatory manner during RAP preparation and will include, among others, any of the following measures: (i) alternative livelihood; (ii) improved agricultural production; (iii) appropriate skills training, and (iv) preferred consideration for rehabilitation and construction work related job opportunities.

A. Project-related employment.

Priority will be given to at least one working age member of the affected households in jobs generated by the project during the construction phase. Depending upon the skills required, contractors will be required to give first option of such jobs to the affected people rather than bringing labor from outside the project areas. The construction-related employment policy needs to be developed by the DWIR-PMU and imposed upon the contractors through contractual agreement. DWIR-PMU's construction-related employment policy would need to be stipulated as part of the RAP and informed to the PAPs/PAFs in a timely manner. DWIR-PMU is recommended regularly monitor the implementation.

B. Agricultural Production Support

Priority will be given to the entitled households to participate in the agricultural production support activities that are part of the project. Affected people will be from households whose livelihoods are mainly agriculture oriented and land based. DWIR-PMU's construction-related employment policy would need to be stipulated as part of the RAP and informed to the PAPs/PAFs in a timely manner as part of the entitled PAPs/PAFs compensation package.

C. Other types of Livelihood Restoration Program

For affected households whose livelihoods are not agriculture-based, other support for instance in business generation (such as vocational planning, small business planning, financial planning, and the accessing and use of credit) and vocational training (through government or private sector programs) can be considered on a case by case basis.

4.8 Information Disclosure, Consultation & Grievance Redress Mechanism (GRM)

A. Identification of Stakeholders

The project is located in the south-western Yangon Region and the townships that are to be directly affected are Dala, Seikkyi Khanaungto, Kyimyindaing and Twante. The stakeholders include the local communities, PAPs/PAFs, local government authorities, CBOs, civil society and business associations in the affected localities. Regarding the PAPs/PAFs, more than 2,000 households and about 40 shipyard business entities were identified during the preliminary site survey in areas that are subject to be

affected by the project implementation, which may require land acquisition and involuntary resettlement.

A list of stakeholders of the proposed project are mapped in Table 4.24 below, with respective engagement plan:

Table 4-24: Preliminary Stakeholder Mapping with Engagement Strategies

No.	Stakeholders		Organizational Analysis & Engagement Strategies (Inform/Consult/Involve/Collaborate)
I. Ministry			
1.	Ministry of Natural Resources and Environmental Conservation (MONREC)	- Director, ECD (Nay Pyi Taw) - Director, ECD (Yangon Region) - Forest Department	- EIA Administrator -> Consult /Involve
2.	Ministry of Transport and Communications (MOTC)	- Directorate of Water Resources and Improvement of River Systems (DWIR)	- Project Proponent (& Supervisor of the overall project implementation)
3.	Ministry of Transport and Communications (MOTC)	- Department of Meteorology and Hydrology - Marine Administration Department - Myanmar Shipyards - Myanmar Port Authorities - Inland Water Transport	-> Consult/Involve/Collaborate
4.	Ministry of Agriculture, Livestock and Irrigation	-Department of Agriculture Land Management and Statistics -Irrigation and Water Utilization Management Department -Department of Fisheries -Department of Rural Development	-Other responsible agencies (who contribute relevant information about specific issues and matters within their jurisdiction. This information may include specific legislative requirements, policy objectives, standards, technical knowledge and expertise, and experience with similar projects or local conditions. Certain agencies also may have the role of providing licenses, permits, approvals or leases.) ->Consult/Involve/Collaborate
5.	Ministry of Social Welfare, Relief and Resettlement	-Department of Relief& Resettlement	
6.	Ministry of Religious	-Department of	

	Affairs and Culture	Archeology and National Museum	
7.	Ministry of Health and Sports	- Department of Health	
II. Region/District/Township Level			
1.	Land compensation and Resettlement Committee	Daw Nilar Kyaw, Minister of Electricity, Industry, Transport and Communication	-> Consult/Involve/Collaborate
2.	South Yangon District General Administration Department	South Yangon District Administrator	
3	Twante, Dala and Seikkyi-Khanaungto Township Development Committee		
4	Development Committee	U Nyein Chan Myint	
5	Dala GAD	U Yin Htwe	
6	Seikkyi Khanaungto GAD	-	
7	Kyimyindaing GAD		
8	Twante GAD		
III. Village (Quarter) Level			
1.	Village Tract and Village Administrator		Wider community
2.	Communities living in and around the project area (residents in the Dala, Twante, Kyimyindaing and Seikkyi Khanaungto Township)		-> Inform/Consult/Involve
3.	Vulnerable Groups (e.g the elderly without family support, the physically disabled, ethnic minorities, female-headed households, etc.) /Women	Identification and list of the group by category among the PAPs shall be identified during the EIA investigation (PAP profiling)	Affected groups (have a significant role in identifying concerns and issues, and in providing local knowledge and information. Their views should be taken into account in choosing among alternatives, in deciding on the relative importance of issues, and in identifying mitigation measures, compensation provisions and the objectives of environmental management plans)
4.	Representatives from local businesses		

	(shipyard owners, boat/ship owners, farmers, fishermen and employees in the associated businesses etc.)		->Inform/Consult/Involve/Collaborate
5.	Directly affected Land Owner and House/Structure Owners and tenants in the land that are to be affected		

B . Initial Consultations with Potentially Affected Persons/Households Carried Out So Far

B-1. Stakeholder Consultation Meetings at Township Level

As part of the ESIA procedure, two rounds of public consultation sessions took place in the four affected Townships(Twante, Dala, Seikkyi - Kanaungto and Kyimyindaing) as part of the ESIA procedure -first round at the scopingstageand the second during the ESIA investigation stage.The estimated nature and scale of the land acquisition and involuntary resettlement was presented to the participants at these sessions:

Table 4-25: Overview of Public Consultation Meetings

Session	Township (Venue: respective Township halls)	Date & Time	Participants	Contents
1 st	Twante	20 Sept. '18	85 persons	<ul style="list-style-type: none"> • Project overview • Briefing on EIA • Key expected impacts • Q& A
	Dala	21 Sept. '18	72 persons	
	Seikkyi-Kanaungto	21 Sept. '18	63 persons	
	Kyimyindaing	15 Nov. '18	24 persons	
2 nd	Twante	28 Jan. '19	178 persons	<ul style="list-style-type: none"> • Project plan • Key expected impacts from draft EIA results/findings • Q& A
	Dala	28 Jan. '19	119 persons	
	Seikkyi-Kanaungto	26 Jan. '19	139 persons	
	Kyimyindaing	29 Jan. '19	42 persons	

The PCMs disclosed relevant information on the project plan, EIA procedure, schedule, and its interim findings including the approximate scope of the land acquisition (with assumption of the ROW demarcating at the FS stage) and results to the potentially affected households and the communities. The presentations invited questions and concerning voices from the public around the topics summarized as below:

Questions & Concerns raised from the 1st PCM

- Land compensation for affected person;
- Potential impacts to agriculture sector affected by the salt water from Yangon and Tow Rivers;
- Concerns about salt water level which can damage to the river bank;
- Request to guarantee of the construction quality control and maintenance of the project;

- Request for plantation of mangrove at the bank of the canal area;
- Request to government to control under the Rules and Regulations of using boats in Canal;
- Suggest making sure for the accurate ESIA survey
- The other side of Kyimyindaing is still weak development and there have land related issue. So, be careful when the project implementation. We are welcome the project, we would like to help and cooperate as much as we can.

Questions & Concerns raised from the 2nd PCM

- Land compensation for affected persons;
- To relocate the houses even before the project starts;
- Concerns about discharge sewage into the creek directly;
- Request to announce the project information in DWIR Facebook page;
- Request for repairing the houses in rainy season before the project implementation;
- Request to DWIR for using and repairing the village roads;
- Suggest they want to promote their livelihood;
- To grow the mangrove trees along the Twente Canal;
- They relocate to other place if arrangement is near the old places;
- The other side of Kyimyindaing is quite poor and there have health, education and bank erosion issues. Thus, it is needed to consider about their opportunities and embankment. As summarized, they welcomed the project and are willing to help and cooperate as much as they can.

A-2. Focused Group Discussions (FGDs)

FGD is a information disclosure, communication and consultation tool targeting a particular group of affected communities and individual who has collectively distinctive interests or types of the projects due to their occupation/geological locations and other socio-cultural and economic attributes. In the case of this project, a shipyard community in Kanagungto constitutes a particular and distinctive interests as their day-to-day shipyard operation may be affected due to the project implementation. While the DWIR decided not to disturb their business interest by delineating a ROW without disturbing the boundaries of the facilities, it was reported that there are felt concerns from the Kanaungto Community related to the project.

Another FGD targeting the Dala farmers and resident representative has been decided to be carried out during this mission, with the recommendation by the DWIR/PMU.

Two rounds of FGDs with the shipyard operators' community in Seikyi Kanaungto Township and affected farmers in Dala Township (24 Dec 2018).

A series of focus group meetings had been accomplished as described in Table below:

Table 4-26: Focus Group Discussion in the Study Area

Dates /Venue	Participants	Background /Objectives	Key Findings
24th December 2018/ Taung Thu	-Shipyard Association (19 people)	[Background]	[Operation Status]

<p>Gyi Restaurant, SeikkyiKhanaungto Township</p>	<p>-DWIR-PMU: 2 Personnel incl. Mr. Maung Maung Lwin _ Assistant Director</p> <p>-ESIA consultants</p>	<p>Most residents are considered to be involved in shipyard-related business (including operation and management). Thus, this community has particular interests, i.e. operation of shipyard business. The affected groups include both the management and the workers (and their respective families)</p> <p>[Objectives/Program]</p> <p>1) Info gathering (Socio-economic profiling & business activity status) 2) Checking their engagement status (on the project implementation esp. on determining the ROW) 3) Identification of their concerns about + expectation from the project 4) Group discussions on the raised concerns and (ideally) finding agreed solutions (collectively)</p>	<ul style="list-style-type: none"> • 40 registered shipyard business entities in operation (32 private & 8 MPA-owned enterprises) • Oldest with more than 60 years' operation • Paying taxes ("fees") to the government (before the current administration) but the business license has not been officially issued. • Profit has been declined since 2013/2014. • Minimum 10 workers per operation (12,000~15,000kyat daily wage on average) • Sedimentation problem is hampering the shipyard operation: companies are financing their regular dredging activities by themselves for 30,000 kyat for one time dredging) • Both wet dock (not available for full tide) and dry dock in operation <p>[Opinions &Requests]</p> <ul style="list-style-type: none"> • Timely project progress information disclosure (with concrete project location) is required • Concerns about potential disruption of the operation and loss of income and economic activities, resultant layoff of the workers • Design consideration and ROW demarcation is required to minimize the disruption • Compensation needs to include the taxes and the
---	--	---	---

			<p>future loss of incomes during construction</p> <ul style="list-style-type: none"> Relocation of the shipyard is "simply not possible" due to the lack of the available area GRM to be established
<p>24th December 2018/ Hpayar Gyi Village, Twente Township</p>	<p>- Farmers (19 people)</p> <p>-DWIR-PMU: 2 Personnel incl. Mr. Maung Maung Lwin – Assistant Director</p> <p>-ESIA consultants</p>	<p>[Background] Project activities will be highly likely to have significant impacts on the lives of farmers along the river: their farmlands could be subject to land acquisition and they might have to be relocated and resettled in other places.</p> <p>[Objective/Program] 1) Info gathering (Socio-economic profiling & business activity status) 2) Checking their engagement status (on the project implementation esp. on determining the ROW) 3) Identification of their concerns about + expectation from the project 4) Group discussions on the raised concerns and (ideally) finding agreed solutions (collectively)</p>	<p>[Findings]</p> <ul style="list-style-type: none"> Majority of the affected land are private rain-fed rice paddies (not CN land), partially irrigated from the canal water (daily 8-hour pumping to 8 acre paddy through double-pipe from the canal) Portable water drawn from the village pond. No water shortage so far & 50 % of the households in the village has artesian wells within their residential area <p>[Opinions & Requests]</p> <ul style="list-style-type: none"> Partial (less than 50%) of the land to be acquired and the residual lots the farmers wish to continue to farm: Income loss due to partial land acquisition is concerned. Timely relocation assistance and compensation: Cash compensation for agri land and land-for-land for the residence is preferred. (Land-for-land for agri land is "not feasible in this area due to the unavailability of land) Relocation is preferred during dry seasons. Potential disruption of the agricultural

			irrigation needs to be managed by the Contractor (e.g. identifying and providing alternative flow and irrigation channel in advance of the construction)
--	--	--	--

Figure 4-11: Focus Group Discussion with Shipyard Association in SeikkyiKhanaungto Township

Figure 4-12: Focus Group Discussion with Affected Farmers in Twente Township

Recommendations based on the major stakeholders for the RAP establishment are summarised as follows:

- Provide options for land-for-land/cash compensation/relocation assistance options for the PAPs/PAFs subject to land compensation
- Provide alternative irrigation options through designing especially for the affected farmers along the canal.
- Public consultation activities should be conducted throughout all the stages of the project.

The establishment and operation of GRM (Grievance Redress Mechanism) is highly recommended as a vital consultation activity.

Monitoring by the project proponent (DWIR) and external agents should include both regular and ad-hoc consultations and discussions with diverse stakeholders of the project, especially project-affected people, in order to supervise environmental and social performance and to manage unexpected impacts.

Installation of comment boxes at GAD offices of each township could be a good means of collecting opinions, concerns, and feedback from local communities, with timely delivery to the project proponent (DWIR), the local government (YRG), and the Contractor for construction.

Public consultation during the project is to be carried out and improved in accordance with RAP, which will be established in more detail after the detailed design.

B-3. Information Disclosure Activities so far

The Project Proponent (DWIR) posted posters at the major public locations in the affected Townships (including Twente, Dala, Seikkyi Kanaungto and Kyimyindaing also publicized on the overview of the project and invitation to the PCM in major local newspapers including New Light of Myanmar (Myanmar Ah Lin), the Mirror (Kyaymon) and Daily Eleven (See Figure 8.4-6) between 20~21 September 2018 (during ESIA scoping stage) and in the National and Private Newspaper such as New Light of Myanmar (Myanma Ah Lin), the Mirror (Kyaymon) and public disclosure plan in each township office on 22nd January 2019 (during ESIA investigation stage).

C. Suggested Future Information Disclosure and Consultation Activities

International safeguard standards recommend that key information on the land acquisition, compensation and resettlement need to be communicated earlier in the decision-making process in ways that are meaningful and accessible through the project cycle. Thus the updates of the RAP, with revised and updated impact scales, and accordingly adjusted resettlement action plans need to be disclosed to and major decisions regarding the relocation and resettlement packages (including the compensation and other assistance packages) need to be made through timely and sufficient consultation process with all the key stakeholders including the PAPs/PAFs in a timely manner. Following is the suggested action plan for future information disclosure and consultation activities for the proposed project:

Project Stage	Information Disclosure & Consultation Activities	Agent
Detailed Engineering Design (DED)	<ul style="list-style-type: none"> At least one time public consultation workshop shall be carried out during the detailed 	PEA (DWIR-PMU) with the support of the

	engineering designing stage. All the potential PAPs/PAFs, representatives of the affected communities (four affected Townships) and relevant local government agencies shall be invited, informed and consulted through the sessions.	DED Consutlant
Appoval of DED	<ul style="list-style-type: none"> Approved design witll be shared with the PAP/PAFs, affected communities and the relevant agencies. 	PEA (DWIR-PMU) with the support of the DED Consutlant
Detailed Measurement Study (DMS) & Replacement Cost Study(RCS)	<ul style="list-style-type: none"> Plan for DMS and RCS will be publicly announced by Relevant ward authorities. The plan need to be clearly informed to the PAPs/PAFs in particular with the specific dates and the concrete schedules. 	PEA (DWIR-PMU) with the support of the DED Consutlant and RCS Team
Updating RAP (Prior to /during construction)	<ul style="list-style-type: none"> All the identified PAPs/PAFs and relevant agencies need to be consulted during updating the RAP following the approved DED. The opinions, suggestions and concerns of the PAPs/PAFs and the representatives of the affected communities will be incorporated in the updated RAP. Outline of the updated RAP include (In accoranec with the EDCF Safeguard Policy¹⁰): Executive Summary/ Project Description/Scope of Land Acquisition and Resettlement/ Socio-economic Survey of the PAPs/PAFs/ Information Disclosure, Consultatation and Participation/ Grievance Redress Mechanisms/ Legal Framework/ Entitlements, Assitancec and Benefits/ Income Restoration/ Budget and Financing Plan/ Implementation Schedule/ Monitoring and Reporting The updated RAP need to include the future information disclosure/consultation plan and RAP updating plan, if applicable. PEA(DWIR-PMU) will upload the final design on its organizational or project website in a timely manner. 	PEA (DWIR-PMU) with the support of the RAP Consultant

¹⁰ For details of the outlines and content of the RAP, see [Appendix 5] Outline of Resettlement Plan of the EDCF Safeguard Policy
<https://www.edcfkorea.go.kr/site/homepage/menu/viewMenu?menuid=005001006003>

D. Grievance Redress Mechanism (GRM)

Part II of the Land Acquisition Act of Myanmar (1894) stipulates the affected persons' rights to object for the proposed acquisition for the public purpose project initiated by the government of the Myanmar: According to the Section 5 (A): Any person interested in any land which has been notified under section 4 as being needed or likely to be needed for a public purpose or for a company may object to the land acquisition within 30 days of notification, object to the acquisition of any land in the locality, as the case may be.

Objections need to be made to the Collector in writing. The Collector gives the objector an opportunity of being heard either in person then after making inquiries will submit the case for the decision of the Governor, who assigned the Collector, The decision of the Governor on the objections is final. In addition, anybody who raises objections on the matter of land acquisition and compensation could request the Collector to refer the case to the Court.

The EDCF Safeguard Policy also recommends the EDCF-financed project shall include the local grievance redress mechanism for ESIA and the grievance redress mechanism for the Resettlement Action Plan (RAP).

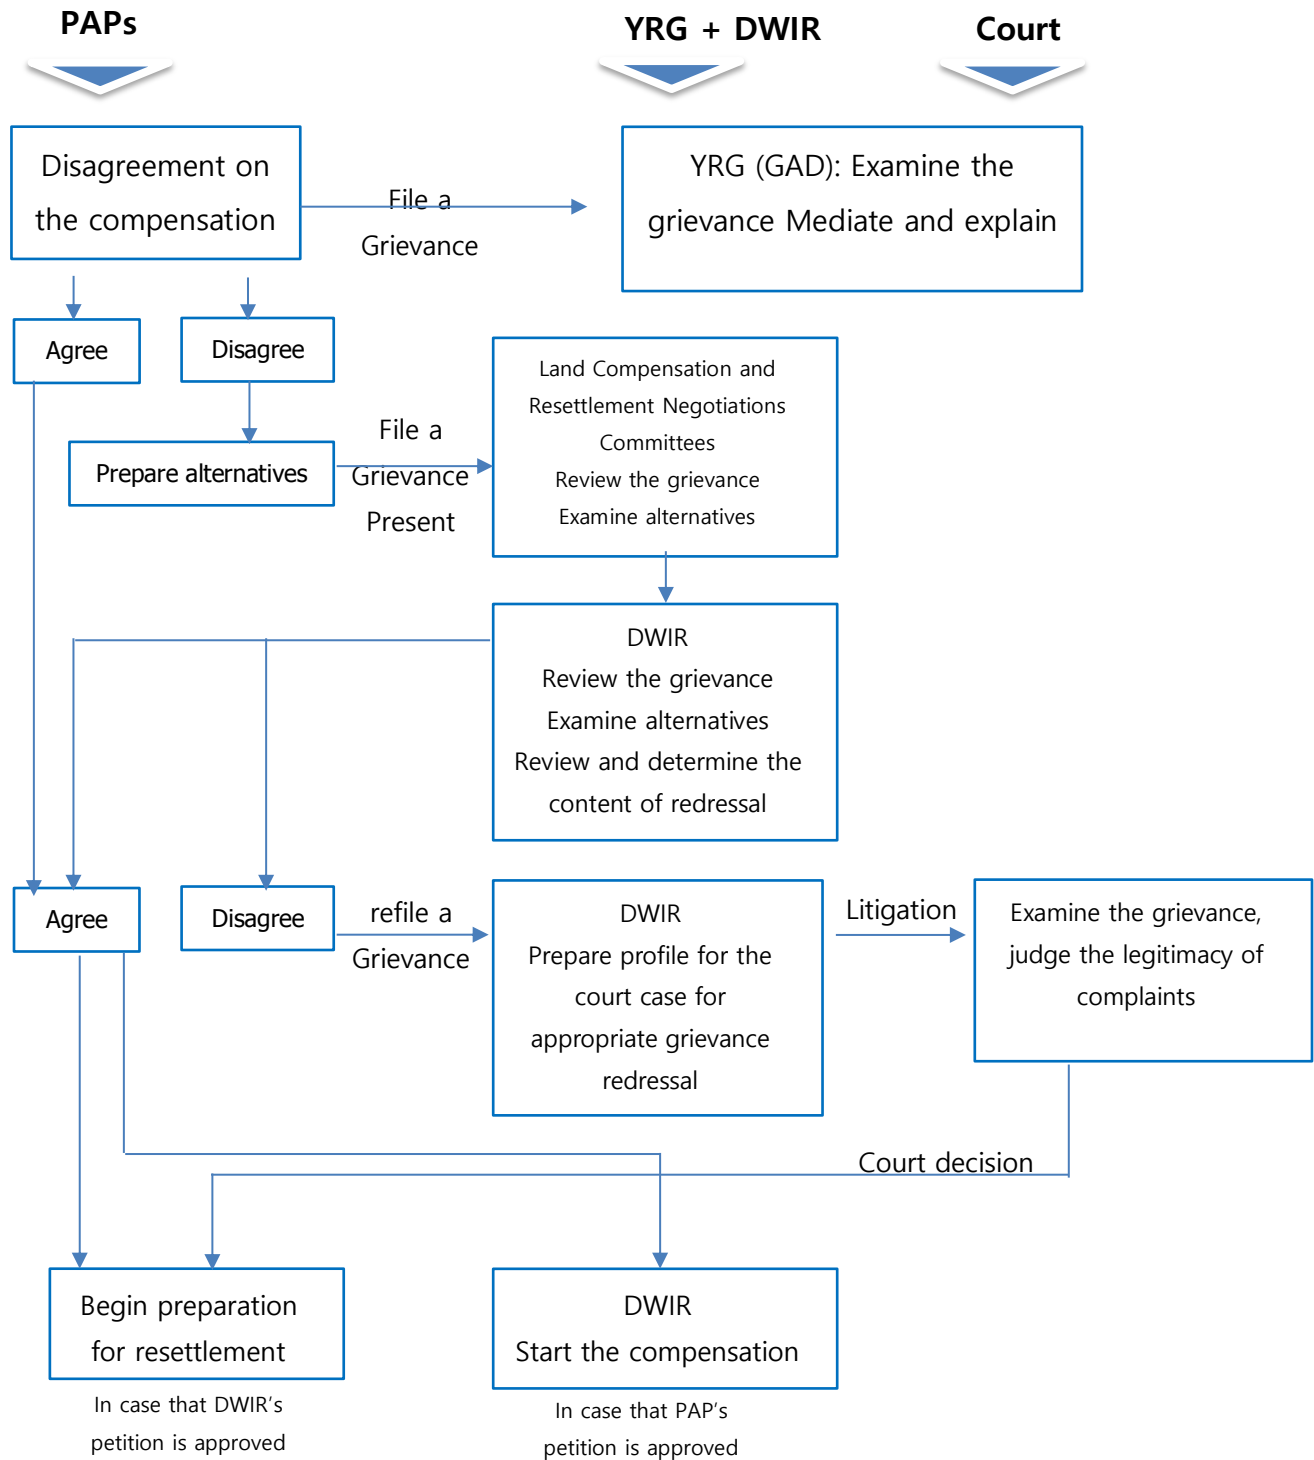

According to the EDCF Safeguard Policy, the GRM needs to be established based on the following principles:

- **Systematic and appropriate scale to the anticipated risk of the project:** Due to the potentially significant social impacts of the project, it is highly important to establish a fully developed GRM Mechanism in a timely manner.
- **Gender consideration:** It is desirable that the focal point of the GRM also include a designated person in charge to deal with the grievances related to women.
- **GRM operation in a culturally acceptable way of the recipient country:** Most GRM process are related with land acquisition and compensation plan about the loss of assets and lands. Thus, the government body such as GAD office or the project related government department will stand as the administrator.
- Application of project-specific procedures & presentation of all content of complaints required

For the proposed project, in case of any objection to the compensation offered by the PEA(DWIR) through the administration of the YRG, the concerned PAP can file PAPs file a complaint to the general administration of the YRG within 30 days after the notification. Then YRG(GAD) will undertake the review and carry out mediation. If the grievances cannot be resolved, relevant committees (investigation, compensation, or relocation committees) established internally in the YRG will examine and decide to accept or reject them, to propose solutions. If agreement cannot be reached despite this, a

court will decide the legitimacy of the grievances. For the work period of each process, relevant institution or person is responsible for confirming the period of processing works and inform it all the relevant. The grievance redress mechanism is presented in the diagram below.

For the grievances related to the resettlement and other types of complaints related to the project implementation, it is recommended that the PAP makes avail of the local grievance redress mechanism (GRM) institutionalized by the PEA(DRIW-PMO). For more details, see the ESIA Report Chapter 9 on Grievance Redress Mechanism.

Conceptual Model of Grievance Procedure

4.9 Monitoring, reporting and Evaluation

The monitoring and evaluation shall be carried out during and after relocation or resettlement activities by DWIR and YRG.

The effects of a RAP are tracked against the baseline conditions of the population before resettlement. This baseline is established through the census, assets inventories, land-use assessments, and socioeconomic studies of the population and the area affected by the Project.

Monitoring and Evaluation (M&E), including reporting, will be regularly carried out as a major element of the management of the RAP implementation throughout the period of RAP implementation. The RAP implementation has to be efficiently managed to ensure that:

- (i) the RAP implementation will be completed as scheduled and within the budget;
- (ii) the outputs and outcomes will meet the quality specifications; and
- (iii) the effects will meet the expectations of the RAPs. The M&E task will provide feedback information to enable the management to determine:
 - 1. Whether the resettlement activities that are on the critical paths of the Project will cause any delay to the Project implementation schedule.
 - 2. Whether the mitigation measures are effective and adequate.
 - 3. Whether the PAPs are further affected and placed under severe hardship.
 - 4. Whether the management is alerted to the delays and problems and takes effective corrective actions.

The Project will establish systems for internal and external M&E to support the management of RAP implementation. The monitoring mechanism would include both international and external monitoring activities:

A. Internal Monitoring

Internal monitoring will be done by DWIR and YRG, if possible, PAHs or PAH representatives shall also be included.

The specific objectives of the internal monitoring are to:

- 1. Verify that the baseline information of all Project Affected People (PAPs) have been carried out and that the valuation of assets lost or damaged, and the provision of compensation, has been carried out in accordance with the approved Resettlement Action Plan;

2. Oversee that the RAP is implemented as designed and approved; and
3. Verify that funds for implementation of the RAP are provided by the DWIR and YRG in a timely manner and in amounts sufficient for their purposes, and such funds are used in accordance with the provisions of the RAP.

The main indicators to be monitored regularly are:

1. The entitlements of PAPs are in accordance with the entitlement matrix mentioned in and that the assessment of compensation is carried out in line with agreed procedures;
2. Payment of compensation to the affected people in the various categories according to the level of compensation described in the RAP;
3. Public information and public consultation and grievance procedures as described in the RAP;
4. Consultation and participation of PAPs in designing and implementing livelihood support program.

B. External Monitoring

External monitoring shall be carried out by NGOs or independent groups.

External monitoring should be periodically carried out by an independent monitoring agency to provide an independent view on the achievement of the RAP. The external monitoring will focus on the outcomes and results of compensation and livelihood support such as the changes in living standards and livelihoods of the PAPs, the effectiveness, impact and sustainability of entitlements, the need for further mitigation measures if any, and to learn strategic lessons for future policy formulation and planning.

The external monitoring can adopt some of the following indicators:

5. Full payment to be made to all affected persons sufficiently before land acquisition.
6. Completion of land acquisition before the construction starts.
7. Public consultation and awareness of compensation policy: (a) All PAPs should be fully informed and consulted about land acquisition and compensation, and livelihood support; (b) Ongoing of public consultation meeting each month regarding problem, issue or grievance related to the compensation and livelihood support.
8. The operation of the mechanisms for grievance redress, and the speed of grievance redress will be monitored.
9. The level of satisfaction of PAPs with various aspects of the livelihood support program will be

monitored and recorded.

10. Throughout the implementation process, the trends of living standards will be observed and surveyed. Any potential problems in the restoration of living standards will be reported, and recommendation for further adjustment of the plan and approach should be made if necessary.

The following activities are the standard functions of the external monitors:

1. Verification of internal monitoring reports, by field check of the following:
 - payment of compensation including its levels and timing
 - livelihood restoration
 - satisfaction of PAPs towards the RAP implementation
2. Interview random samples of PAPs to assess their knowledge and concerns regarding the compensation process, their entitlements and rehabilitation measures.
3. Check the type of grievance issues and the functioning of grievance redress mechanisms by reviewing processing of appeals at all levels and interviewing aggrieved PAPs.
4. Survey the standards of living of PAPs to assess whether they have been improved or maintained.
5. Advise Project management regarding possible improvements in the implementation of the RAP.
6. Regular external monitoring should begin along with implementation activities and carry on until the end of the RAP and Project phasing out.

In addition, based on the agreement between the PEA and the Export-Import Bank of Korea, PEA will report the RAP performances to the Bank on a regular basis, or upon request.

Following are the suggested monitoring framework for the land acquisition, compensation and resettlement:

Impact	Performance Indicators	Responsible Entities	Reporting to	Frequency	EDCF Safeguard Policy
Pre-Construction					
Land acquisition and involuntary resettlement (for land clearing, equipment mobilization)	Develop Resettlement Policy, Framework & Resettlement Action Plan (RAP)	Team/Focal point in charge of land Acquisition, Compensation and Resettlement of DWIR-PMU	DWIR-PMU & Land Compensation and Resettlement Negotiations Committees (LCRNC)	Upon the completion of the policy, framework and the RAP In case of update of each, within 15 days after the completion	DWIR submit the final RAP to KEXIM

Impact	Performance Indicators	Responsible Entities	Reporting to	Frequency	EDCF Safeguard Policy
and access road development (if applicable)	Land acquisition, compensation and resettlement progress report	Team/Focal point in charge of land Acquisition, Compensation and Resettlement of DWIR-PMU	DWIR-PMU & Land Compensation and Resettlement Negotiations Committees (LCRNC)	Quarterly of the updates	DWIR submit the performances on info disclosure, consultation and GRM (as part of environmental and social monitoring report) to KEXIM on a regular basis (as agreed between DWIR and KEXIM: either annually or biweekly)
Info disclosure, consultation & GRM	Include info disclosure, consultation and GRM Plan as part of the Resettlement Action Plan (RAP), Submit implementation progress (incl. GRM grievance case management) as part of Environmental and social Monitoring Report Operationalize GRM logbook	Team/Focal point in charge of info disclosure, consultation and GRM of DWIR-PMU. In case for the PAPs/PAFs' objection to the proposed compensation amount, objection received in due course as stipulated in the LAA (1894) shall be referred to the Collector and the Senior Officer authorized by	DWIR-PMU & Land Compensation and Resettlement Negotiations Committees (LCRNC) [For compensation objection case] from the Collector to the Senior Officer authorized by the President of Myanmar [For farmland acquisition related dispute] case referred to Track/Ward -> Township ->	With 15 days after carrying out the consultation session with the stakeholders including PAPs/PAFs including affected communities Within xx (TBC) days after receiving the objection/grievances	DWIR submit the performances on info disclosure, consultation and GRM (as part of environmental and social monitoring report) to KEXIM on a regular basis (as agreed between DWIR and KEXIM: either annually or bi-annually)

Impact	Performance Indicators	Responsible Entities	Reporting to	Frequency	EDCF Safeguard Policy
		the President of the Union of Myanmar, shall refer the case to the Collect to further examine the case. If deemed necessary, the case is referred to the court. For farmland Track/Ward-Township-District-State level management body to receive any related grievances, adjudicate and in case the solution is not sought for an d settled, refer the case to the immediate upper level of body. level GRM focal point liaising with the DWIR-PMU	District -> State management body		
Construction (after issuance of ECC)					
Land acquisition (Ongoing). Compensation & Resettlement	Land acquisition, compensation and resettlement progress report	Team/Focal point in charge of land Acquisition, Compensation and Resettlement of DWIR-	DWIR-PMU & Land Compensation and Resettlement Negotiations Committees (LCRNC)	Quarterly	DWIR submit the performances (as part of environmental and social monitoring report) to

4.10 Institutional Arrangements

A. General Project Management

The Ministry of Planning and Finance (MOPF) is the official representative of the government as the borrower and recipient of funds. It is the responsibility of this Ministry to (i) fulfil government fiduciary and financial management oversight; (ii) to provide sufficient counterpart contribution for project activities

in a timely manner; and (iii) ensure delays are not encountered in project procurement. Funds flow will be the responsibility of MOPF and will work closely with the executing agency.

DWIR will be the project executing agency and will be responsible for overall project management, coordination and reporting. DWIR has established a PMU. The PMU will have the responsibility for the day to day management, coordination and supervision of the project, as well as consultant recruitment, financing and fund flow and the oversight of safeguard issues and measures and implementation of the RAP.

The national level coordination will also be assisted by a project steering committee which will be co-chaired by a representative of the DWIR and one representative from the MOPF and relevant ministries and organizations(TBC). The steering committee may invite persons and agencies to discuss specific agenda items, when required. The committee shall determine the quorum for effective decision-making.

B. RAP Institutional and Implementation Arrangement

The government institutions are involved in land acquisition, including Ministry of Agriculture, Livestock and Irrigation (MOALI), State Land Records Department (SLRD), Farmland Management Bodies (FMB), Ministry of Natural Resources and Environmental Conservation (MONREC), Central Committee for the Management of Vacant, Fallow and Virgin Lands (CCVFFV) and Department of Human Settlement and Housing Development (DHSHD), City Development Committees and important institution is General Administration Department (GAD). DWIR is project owner and responsible for coordination among institutions and collaboration with relevant institutions not only government but also civil societal organizations.

DWIR has established PMU for the proposed project. The PMU will assume day-to-day management of the project and will be responsible for coordinating and implementing project activities, including procurement, recruitment, disbursement, contract administration, monitoring and reporting and implementation of the RAP. The PMU will be headed by a project manager and will comprise full-time core staff.

For RAP preparation and implementation, the PMU will procure the services of qualified social specialists, internally or externally as appropriate, who will be responsible for RAP preparation and guiding and monitoring RAP implementation, as well as a land valuer.

Based in the PMU, the social specialist will work with the land valuer, and relevant district, township and community officials to implement training and capacity building related to the land acquisition approach and other requirements of this Framework RAP and RAP. The social specialist will carry out their roles and responsibilities in accordance with both the laws and regulatory requirements of Myanmar and the EDCF Safeguard Policy. As required, the social specialists shall provide orientation to the land valuer and implementing agency staff (including contractors (and sub-contractor, as appropriate)) to ensure they understand the basis of market value and the replacement cost survey (RCS) and requirements for negotiated settlement in undertaking the DMS, RCS and the socio-economic survey needed in preparing RAP. The land valuer will help document consultations and negotiations and provide any related information for the resettlement database.

As of July 2019, the Land Compensation and Resettlement Negotiations Committees (LCRNC) has been established at each of the four affected Townships with the following member composition.

Regarding projects involved with involuntary resettlement and land acquisition in Myanmar, a proponent (DWIR) of project will prepare Resettlement Action Plan (RAP) cooperated with relevant regional government and implement activities related with resettlement and land acquisition.

About preparation of RAP for the Twente (Twantay) Canal Improvement project, the ad-hoc committees such as Land Compensation and Resettlement Negotiations Committee (LCRNC), Relocation Committee and sub-committees are to be established under primary committee called Steering Committee for negotiation with project affected persons (PAPs) and preparation of supporting materials for the negotiation.

Land Compensation and Resettlement Negotiations Committee (LCRNC) was formed in September 2018 with each of the four Township-level subcommittee. LCRNC mainly takes a role of determination of a scope of compensation and determination of compensation entitlement. Compensation Committee (a sub-committee within LCRNC) studies unit price of affected crops and lands through confirmation of a market price and decide total amount of compensation cost, as well as analysis of assistance for living restructure. LCRNC also takes the responsibilities for in charge of assurance of land for land-to-land compensation, implementation of re-construction for affected structures, and demolish of affected structures after relocation.

Actual finalization, implementation of grievance management and monitoring will be done by DWIR and YRG. Overview of roles Land Compensation and Resettlement Negotiations Committee and other relevant agencies are shown on Table 4-24- 4-29 below:

Table 4-24: Overview of Roles for Land Compensation and Resettlement Negotiations By Relevant Agency (TBC)

Task Team	Members	Roles	Responsible Organization
LCRNC			
Negotiations Tasks Team	<p>Chairperson: Minister of Electricity, Industry, Transport and Communication Secretary: Division Officer, DWIR</p> <p>Members: 13 persons (from YRG/YCDC/MOTC/MPA) Sub-committees per Township (in Dala, Twente, SeikkyiKanaungto and Kyimingdaing): 38 persons (from YRG/Township GAD Departments/Farmland and Saved Land</p>	<ul style="list-style-type: none"> • Supervise implementation status of RAP in collaboration with DWIR • Ensure that laws and standards to comply with are facilitated • Prepare information materials to disclose regarding projects and RAP • Review and approve investigation reports regarding the scope of compensation • Review and approve compensation agreement • Review and approve compensation payment reports and requests. • Supervise investigation activities of grievance redress system • Consult and coordinate with stakeholders regarding cases required to advance projects • Supervise grievance redress and monitoring after completion of compensation-related activities 	YRG
Investigation Tasks Team	Verification Committee/ Yangon Township Electricity Supply Cooperation etc.)	<ul style="list-style-type: none"> • Grasp the scope of impact • Grasp land prices of affected lands by obtaining the land certificates • Set up the unit price of compensation through investigating the market values of affected lands and structures • Prepare investigation reports regarding the scope of compensation • Request signatures from concerned parties on investigation reports 	YRG

Compensation Tasks Team		<ul style="list-style-type: none"> • Examine and determine the prices of affected lands and structures • Examine the content of compensation in RAP • Examine and propose the content of assistance other than land and structure for resolution of difficulties • Receive complaints (dissatisfaction/disagreement) regarding compensation amount from PAPs • Request approval from Steering Committee regarding the examined content of compensation • Notify PAPs of affected assets • Organize resident briefings • Negotiate the content of compensation with PAPs • Draft compensation agreement • Request signatures on compensation agreement from entitled persons • Examine compensation payment reports • Examine grievance claims, decide acceptance or rejection 	YRG
Relocation Tasks Team		<ul style="list-style-type: none"> • In case of compensation by replacement land, select replacement land and negotiate with PAPs • Undertake the procedure to transfer the title of replacement land • In case of reconstruction of affected structure, determine the details of reconstruction, negotiate with PAPs • Carry out reconstruction of affected structure • Undertake the procedures to transfer the title of reconstructed structure • Remove residual structure after relocation 	YRG
District Law Office			
	Officers : 1	<ul style="list-style-type: none"> • Prepare legal document and undertake the procedures required for compensation • Provide feedback to related committees about required procedures 	YRG
Ministry of Planning and Finance			
	Officers : 2	<ul style="list-style-type: none"> • Prepare compensation payment reports, submit compensation payment requests to DCA. • Prepare for compensation payment, prepare proof of payment after payment is complete • Receive checks from DCA for the amount based on payment requests • Deliver the checks to entitled persons, receive receipts 	YRG
Department of Water Resources and Improvement of River Systems (DWIR)			

DWIR	Officer: U Sein Lwin	<ul style="list-style-type: none"> • Within the department, investigate considerations given by related committees, reflect the result on RAP. • Prepare a final RAP • In case of compensation by replacement land, work with related committees to select replacement land, confirm the finalized replacement land • In case of reconstruction of affected structure, confirm the details and status of reconstruction • Attend the negotiation for the content of compensation with PAPs • Examine grievance claims, determine acceptance or rejection, prepare profiles in case of taking legal actions • Examine and authorize compensation payment reports and requests received from Steering Committee • Issue checks for compensation • Deliver checks for compensation to Ministry of Planning and Finance 	DWIR

4.11 Budgets and Financing

The PMU through the social specialist and land valuer will be responsible for formulating the resettlement and or land acquisition budget based upon information obtained from affected household and field surveys (DMS, RCS) conducted by the project consultants and implementing agency field staff. The costs of resettlement for the project will be calculated based on the RCS applied to the confirmed DMS, and the entitlements set out in the entitlement matrix of RAP (based on the suggested entitlement matrix presented in this Framework RAP). A contingency of 2% of the total project infrastructure investment costs for access road and other additional provisionary items will be included in total project cost estimates for land acquisition compensation to be used as required during implementation of RAP. A total amount for compensation under the project shall be determined later.

All costs for resettlement, including compensation and allowances, staff training and operational and RAP administrative costs, monitoring and reporting and income restoration will be financed by the Myanmar government. MOPF will provide the budget directly to the township DOF who will then coordinate with the PMU and compensation committee to disburse payments of compensation and allowances to affected households.

4.12 Implementation Schedules

Concrete RAP implementation schedules will be developed upon the formulation of the RAP once the DED is complete.

Annex 1. (Initial) Inventory of PAFs**1. Twente Township**

Sr	Owner	Address	Type of building/land/plot	Bilding/ land	Area	Within ROW (%)	GPS number	Latitude	Longitude	Remarks
